A ppt file with several page, Paginator at the beginning is there, then disappears.

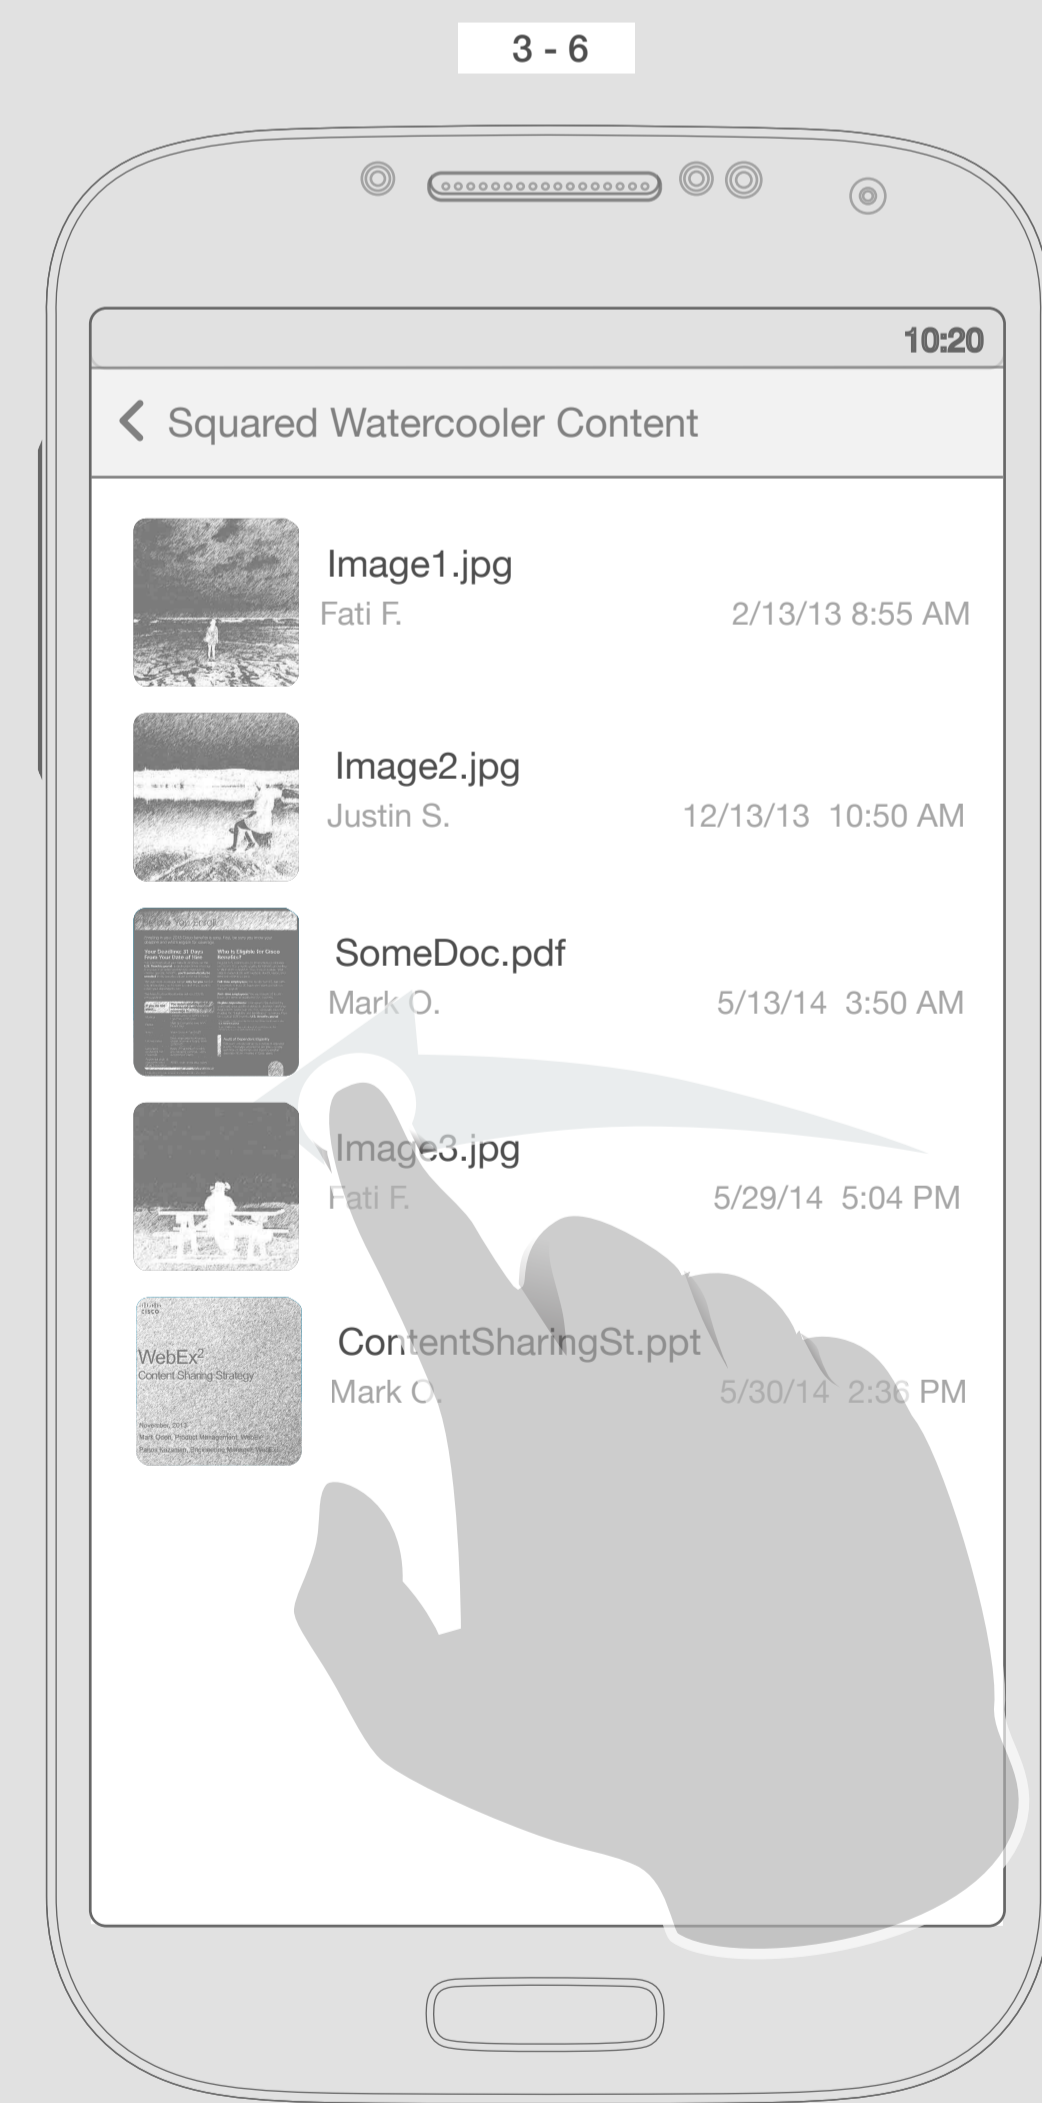

User can scroll vertically through pages of the file, scroll bar & pagination will appear and bars will disappear so give the user more space.

Content Viewer
By tapping this icon user will have access to all files in the conversation thread

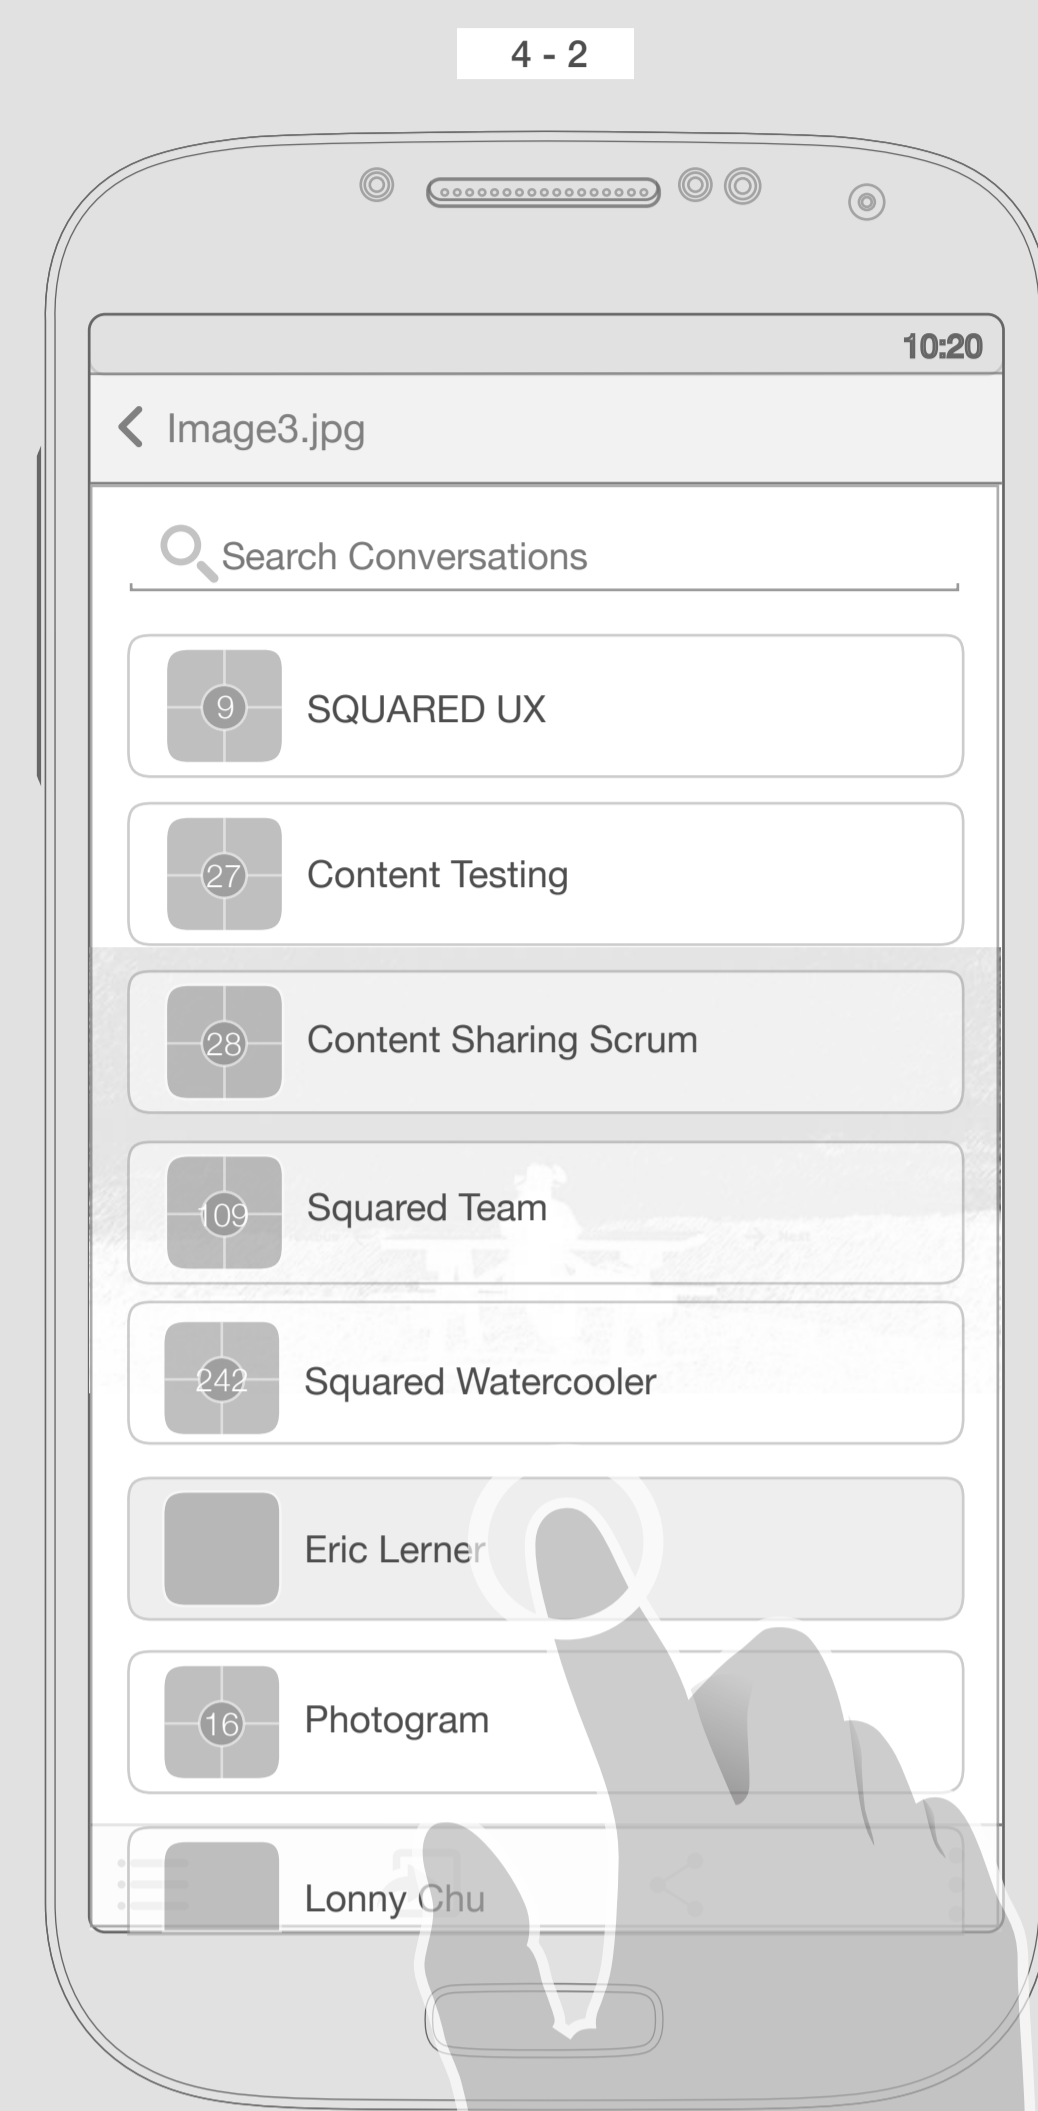

All files in the conversation thread

Swipe left will show the time, date & uploader

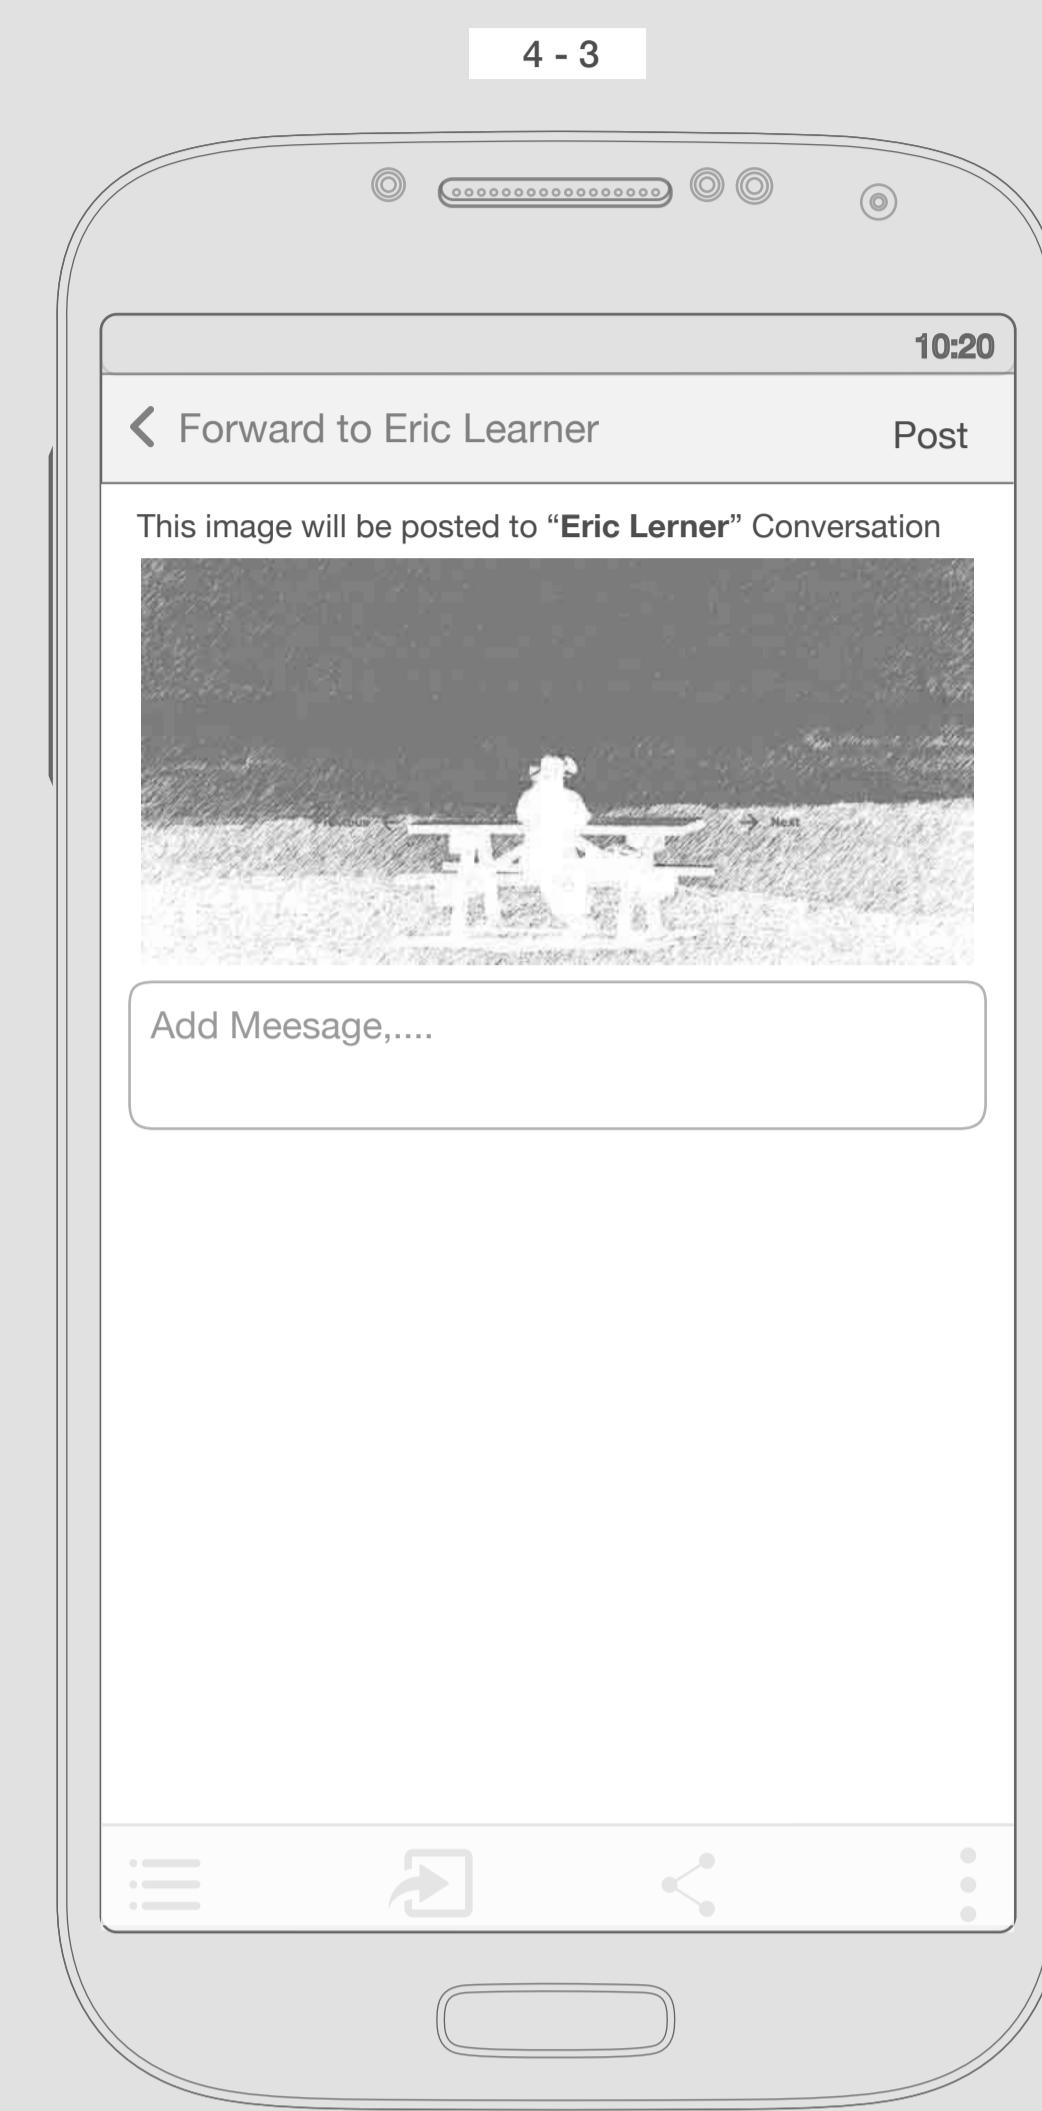

Content Viewer
Forward file or image

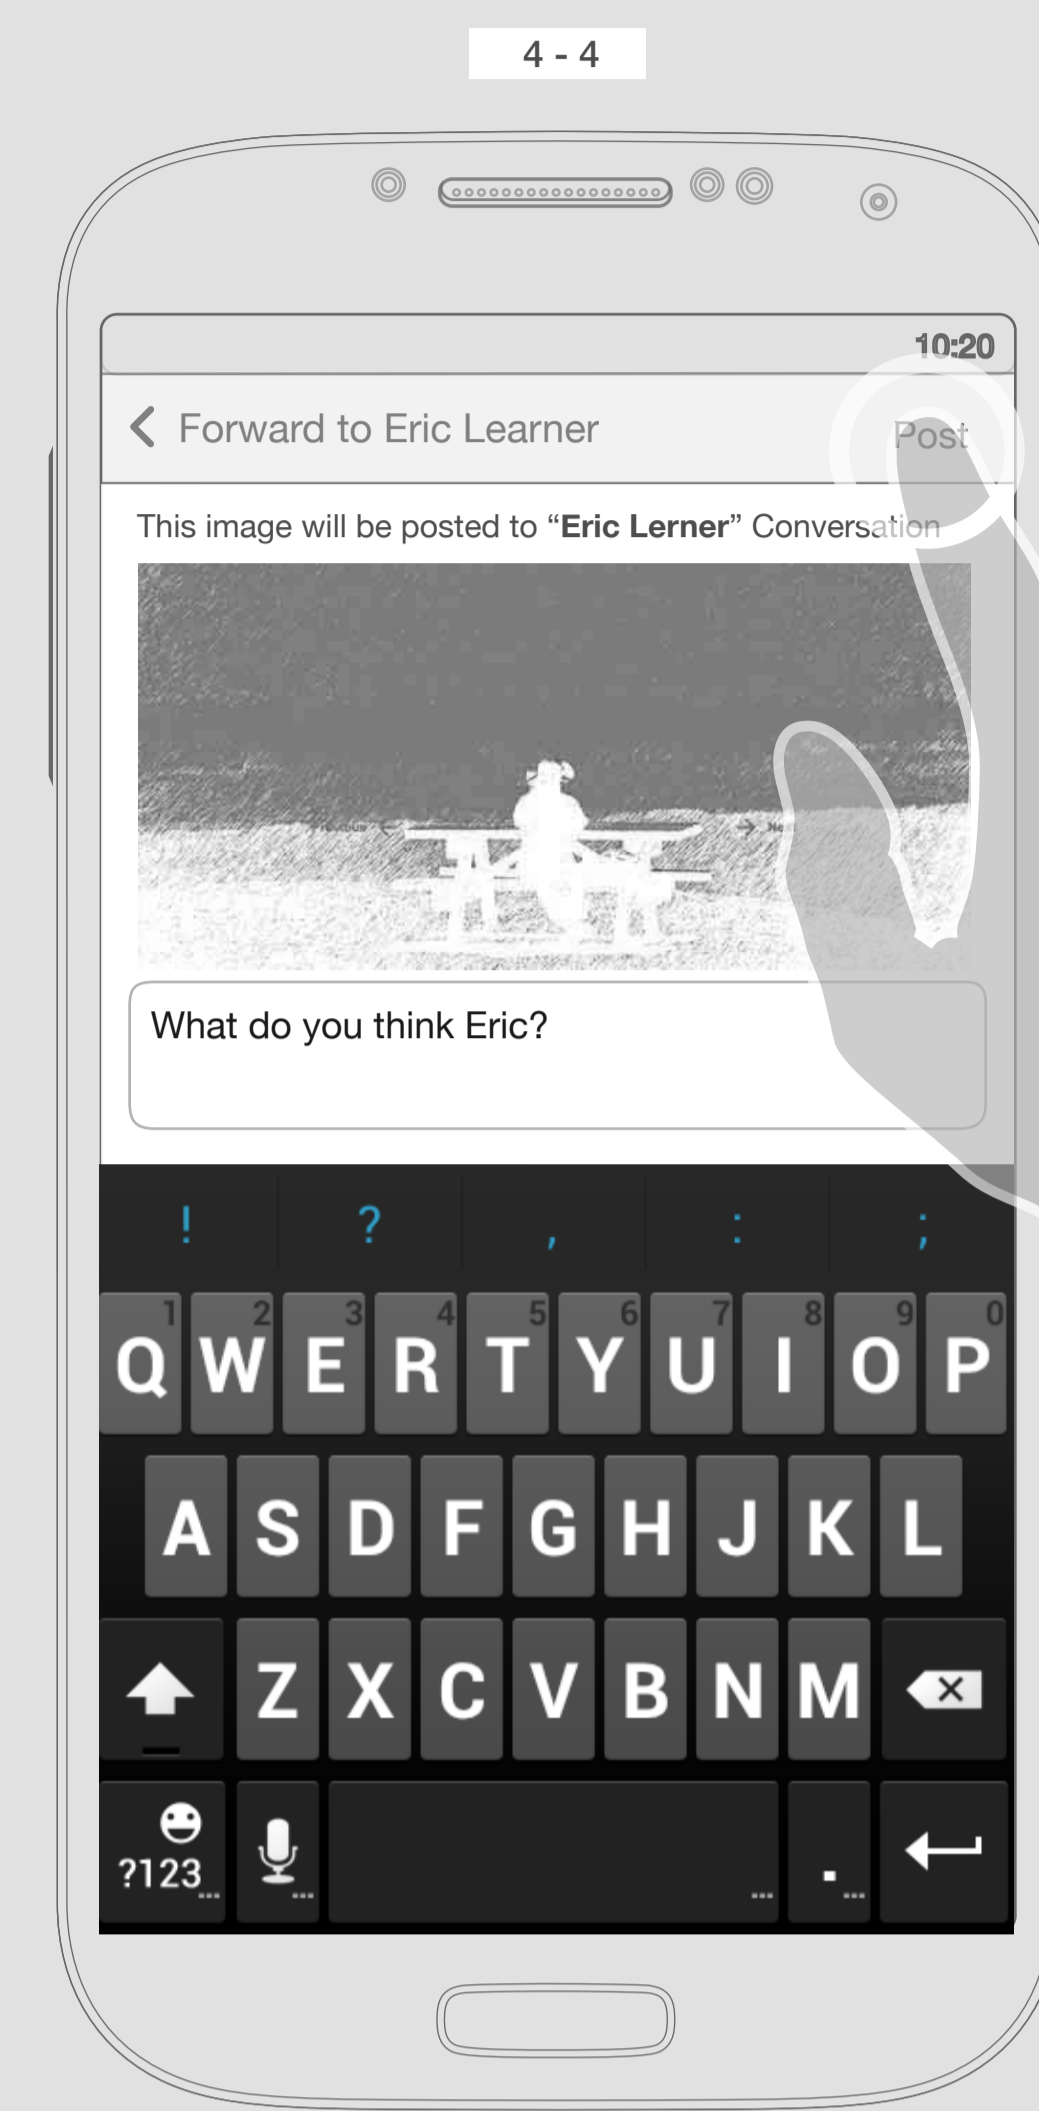

Conversation List; Same as conversation list, with the latest one on the top and user should be able to search in order to find the right conversation easily

*** Forward to a Contact TBD ***

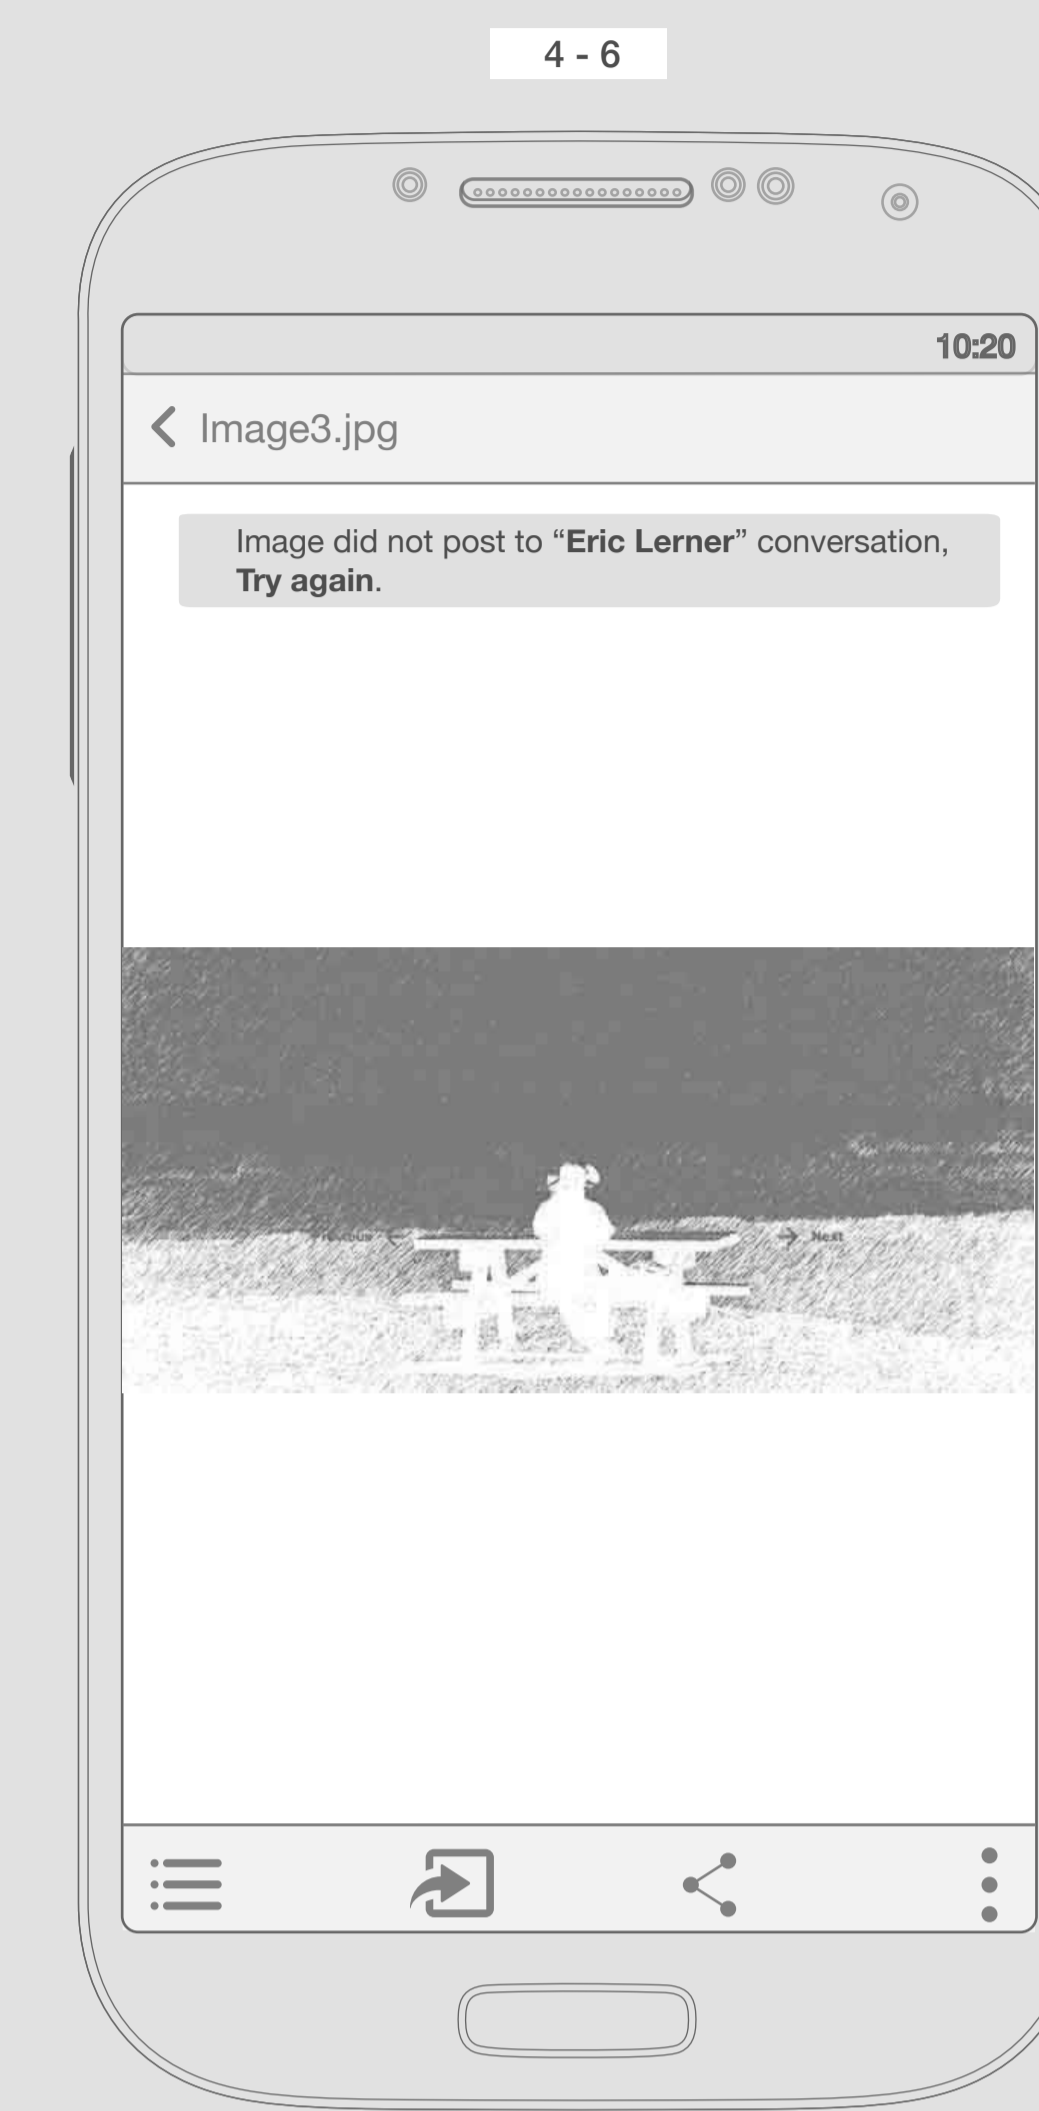

User should be able to post a message with the file.

User should be able to post a message with the file.

Back to the file after tapping "Post". A confirmation toast will show if the image posted also adding the name of conversation (clickable).

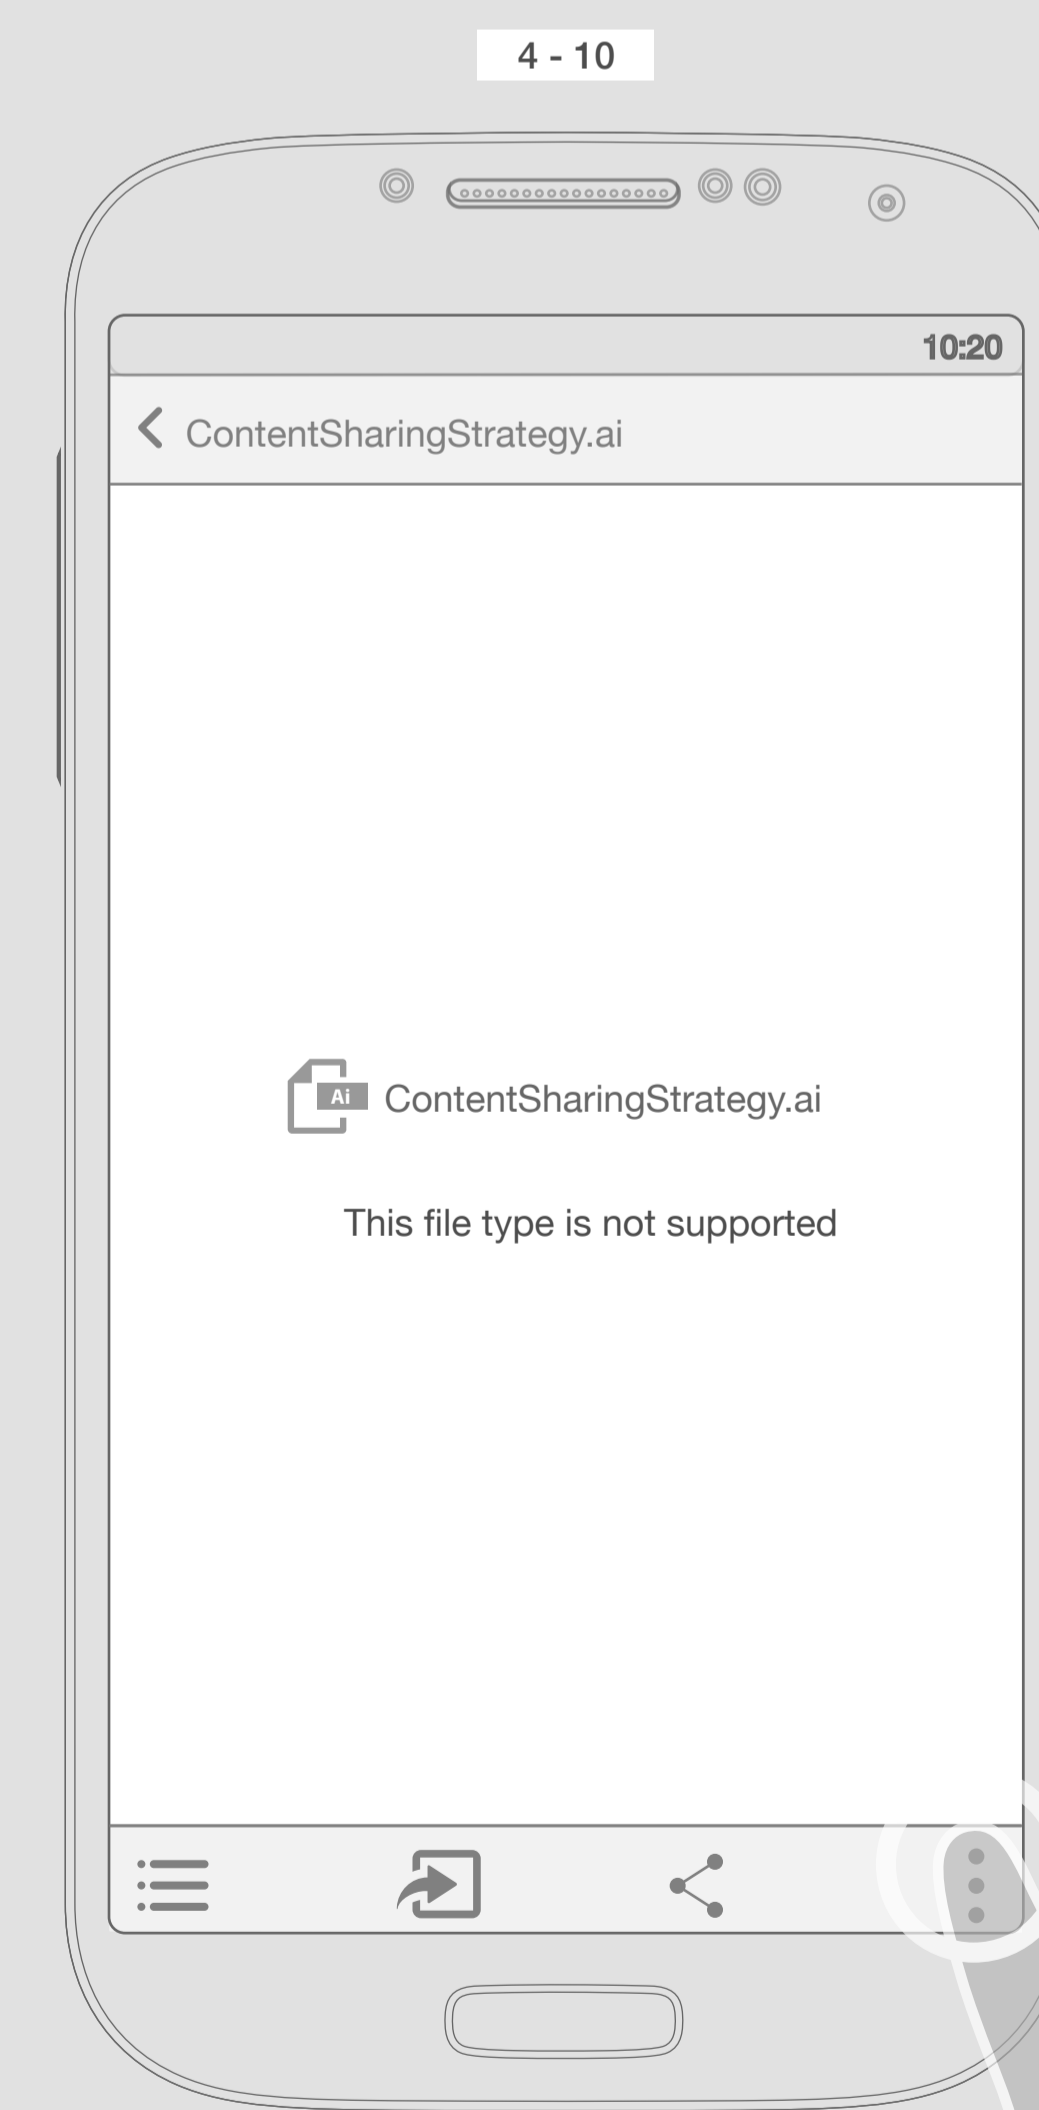

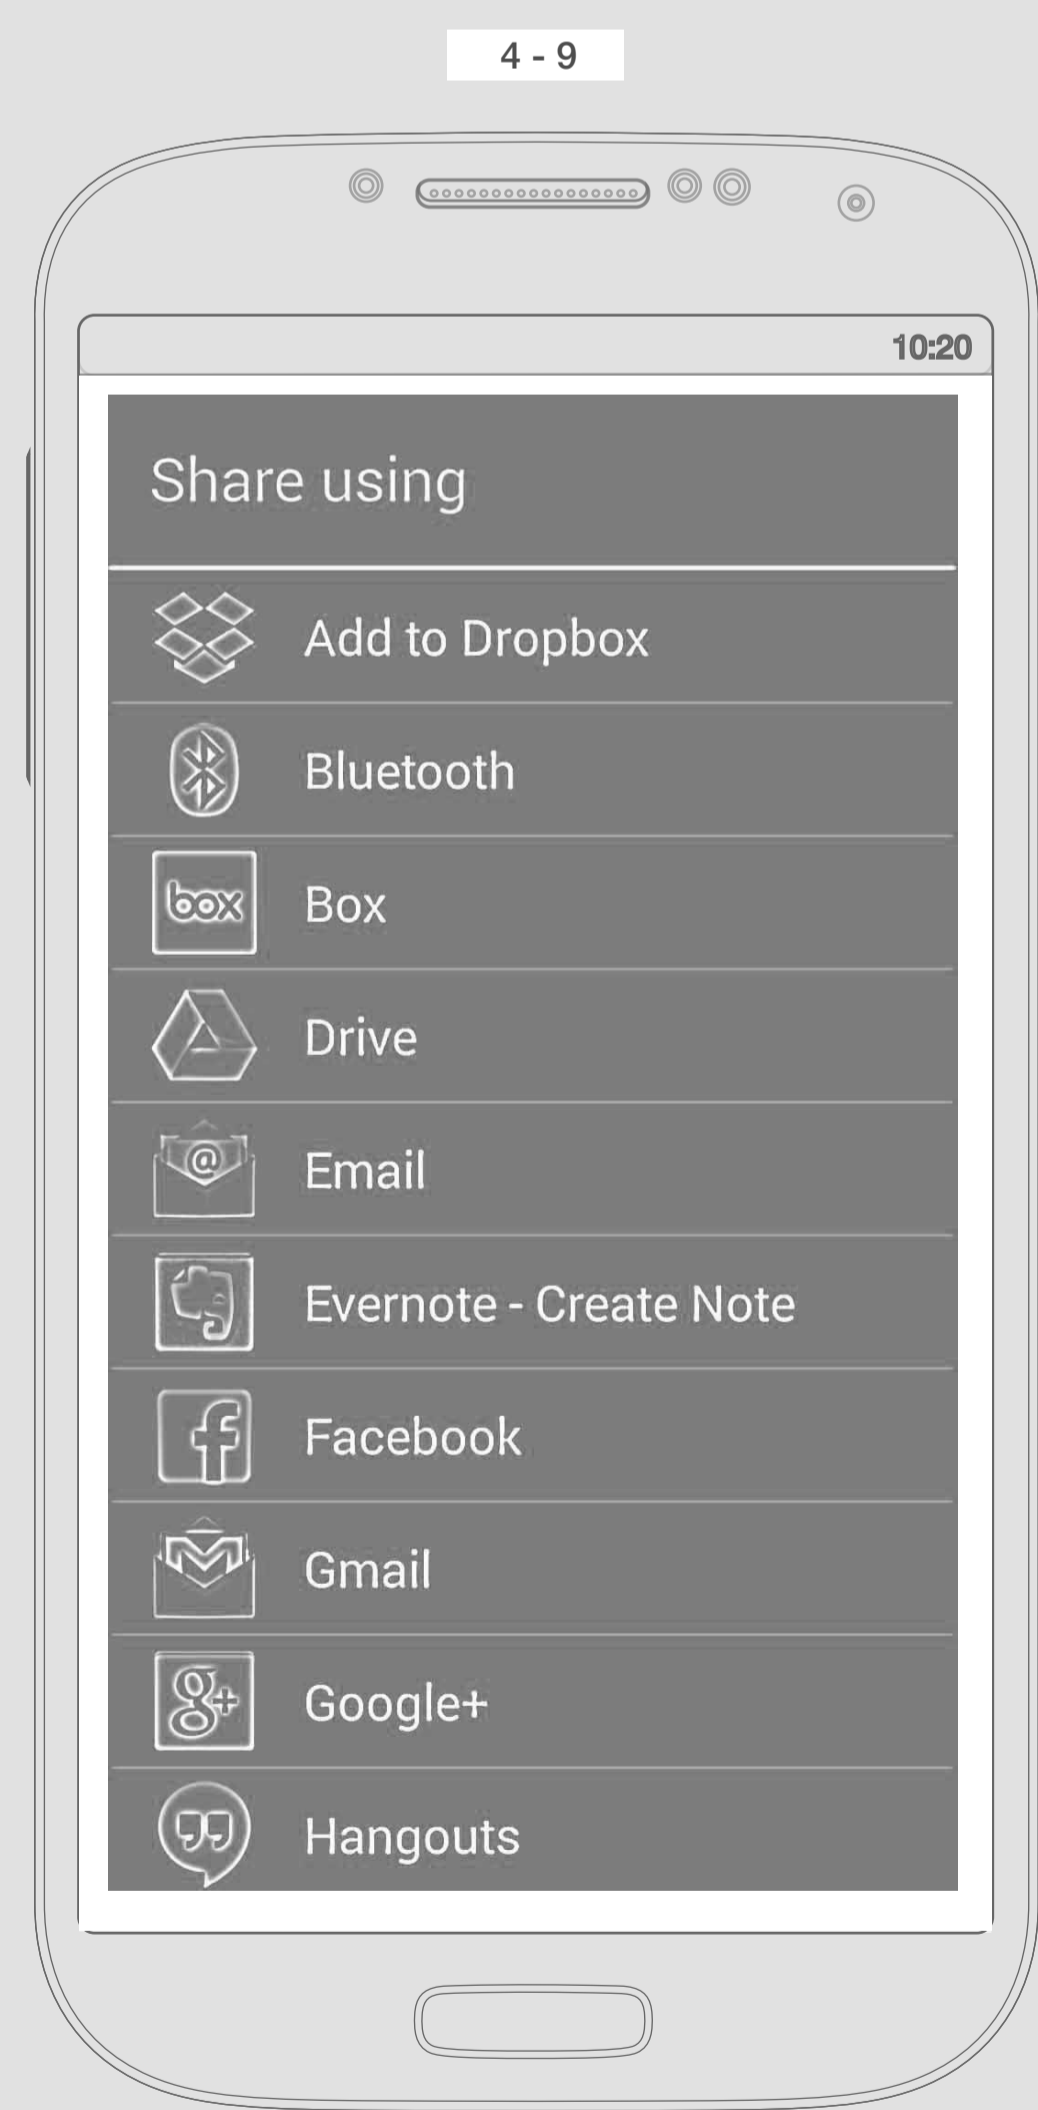

If the image did not post, then user get an alert toast, he can ignore it (goes away after a while) or tap "Try again".

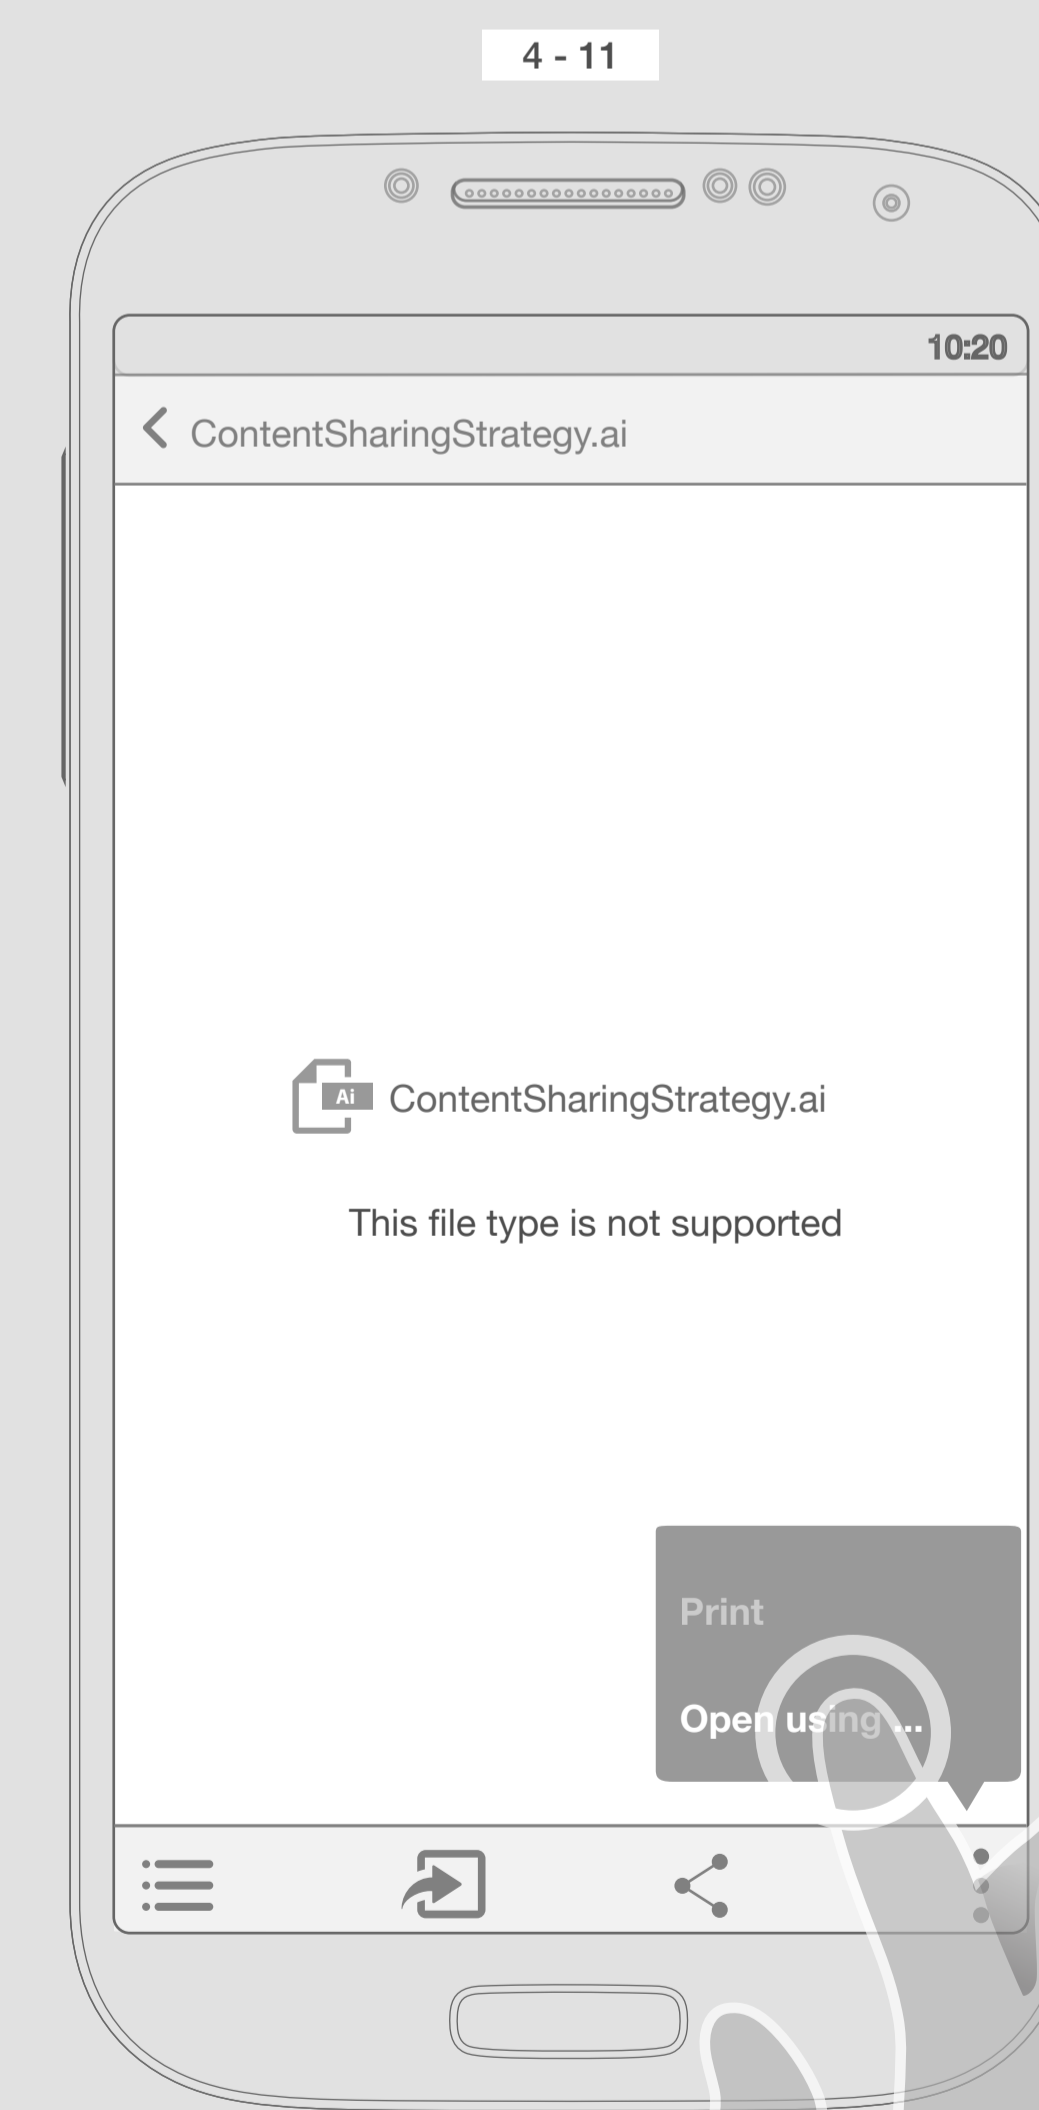

The confirmation toast will disappear after a while.

User also can print a file

Print overlay

Content Viewer
All files in the conversation thread

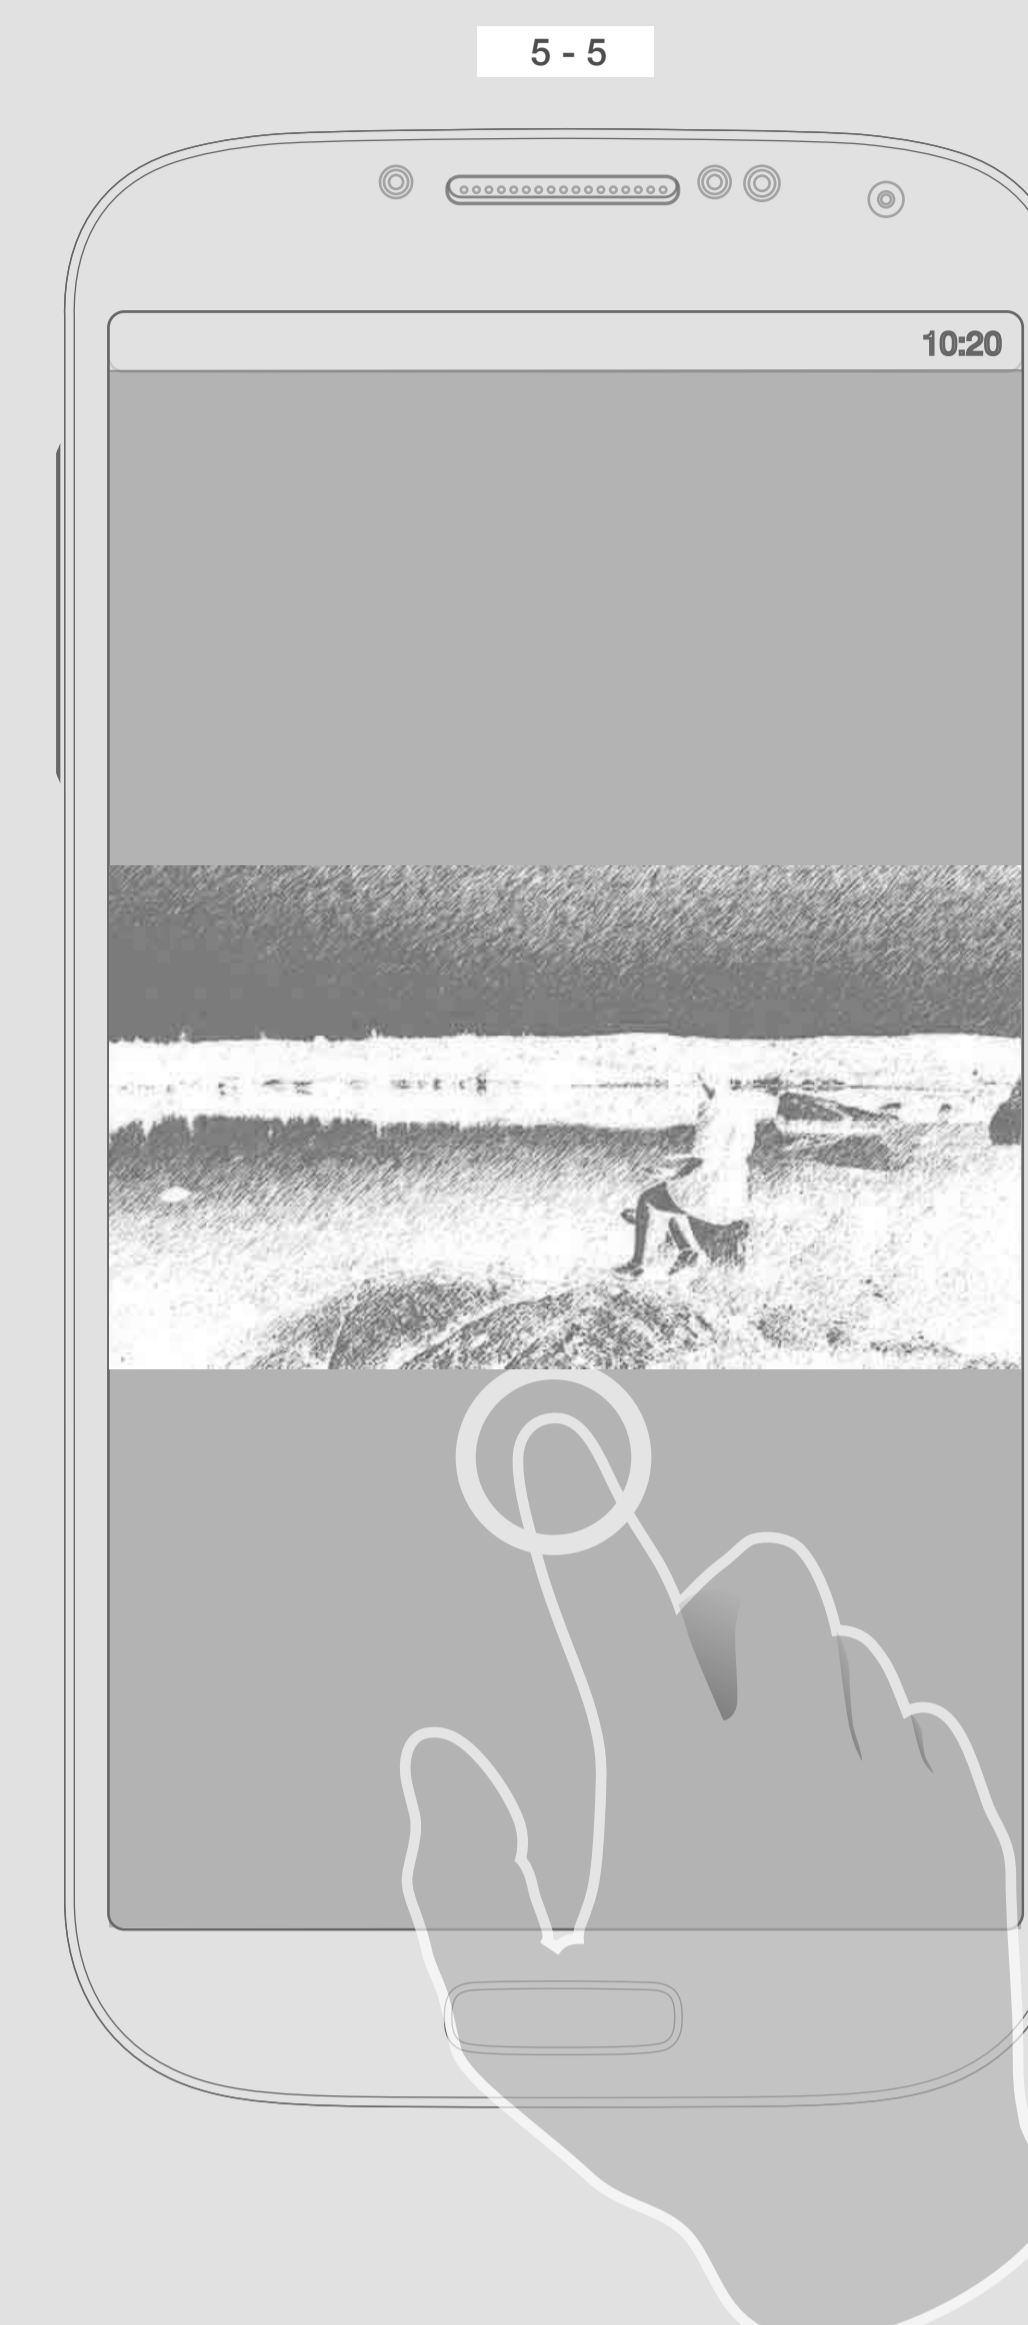

Swipe left & right user can browse between files.
If the user swipes less than 50% of screen and then release it, image should not change, if it is more, then we can see the next photo.
User here swipe left to see the next file.

One tap on the image/file, will remove the top and bottom bars.
If the user did not tap, or do anything, also after a few second, those bars should go away.

Only content
The rule for zoom in is the same as iMessage, double tap or using pinch gestures

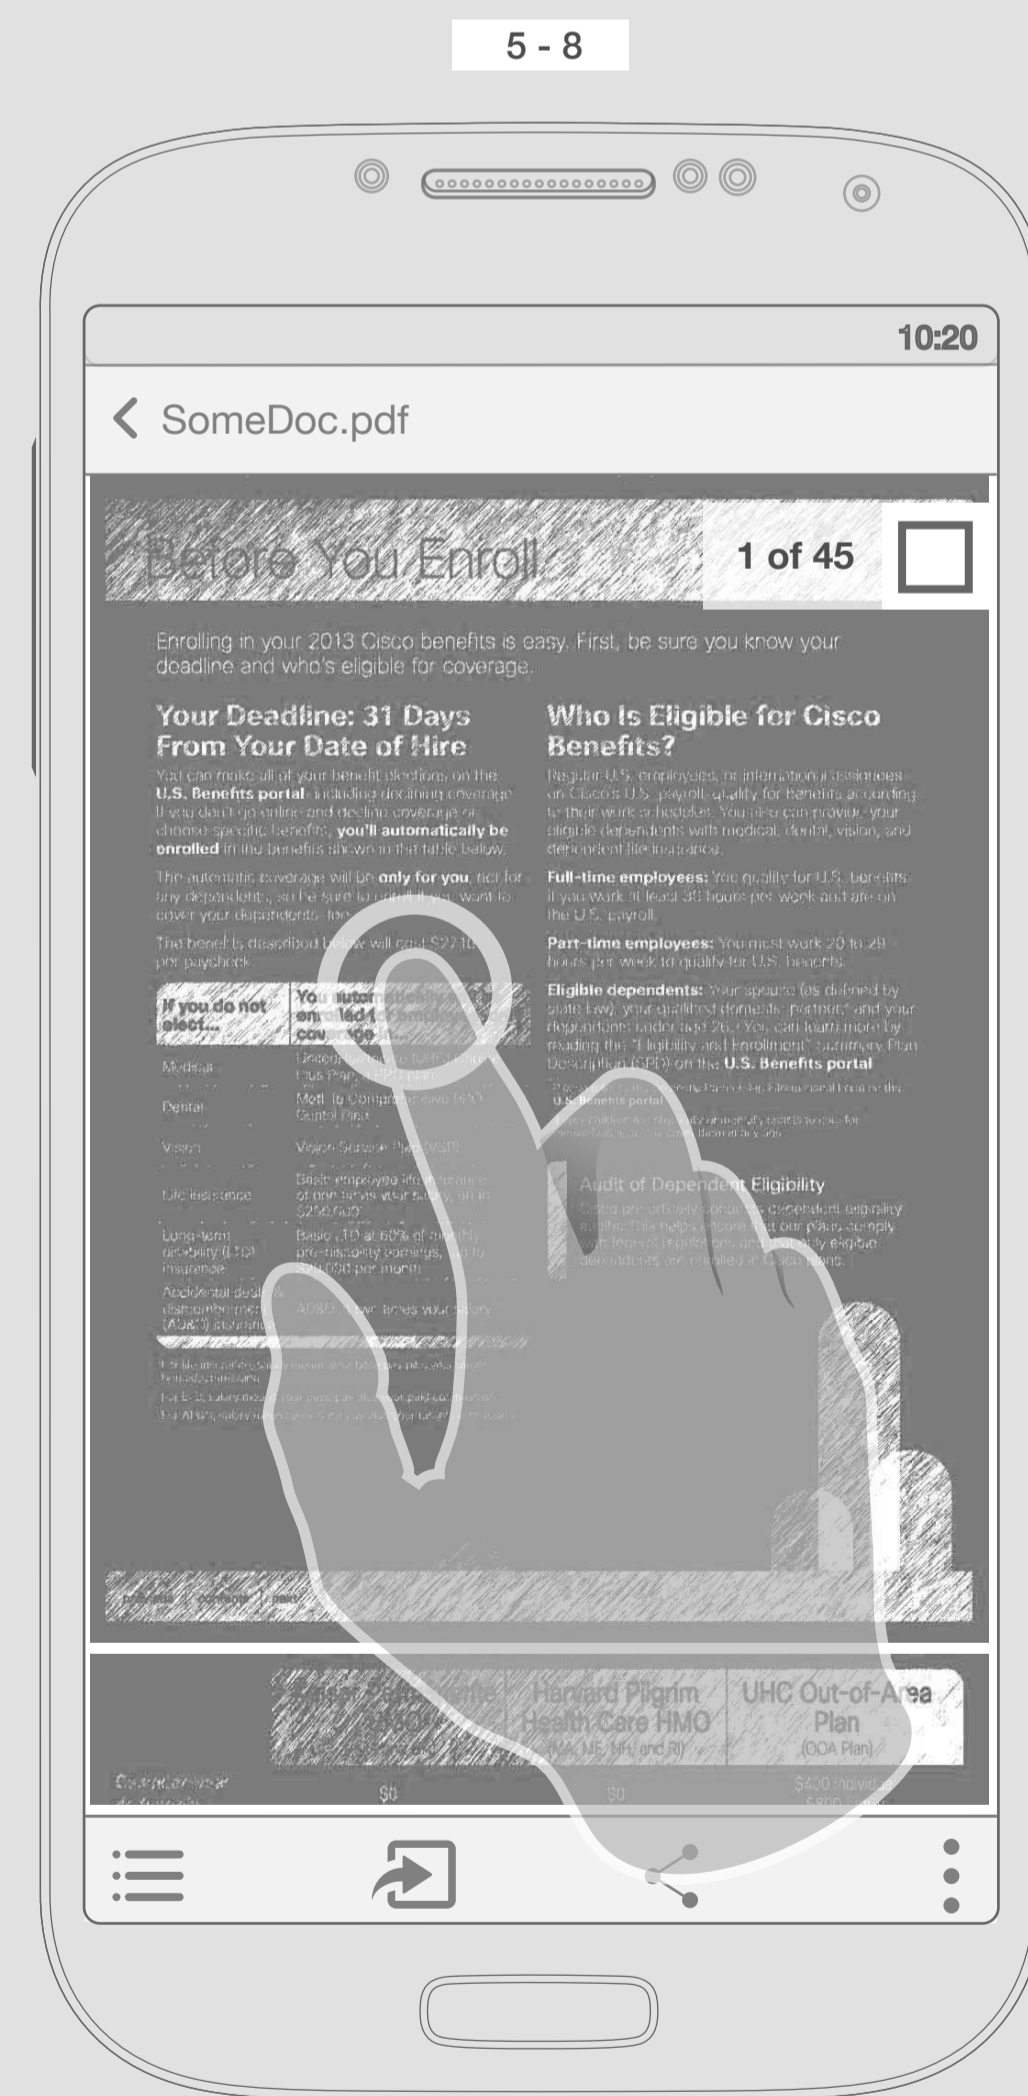

Another tap, will bring all the items back (Top & bottom bars)

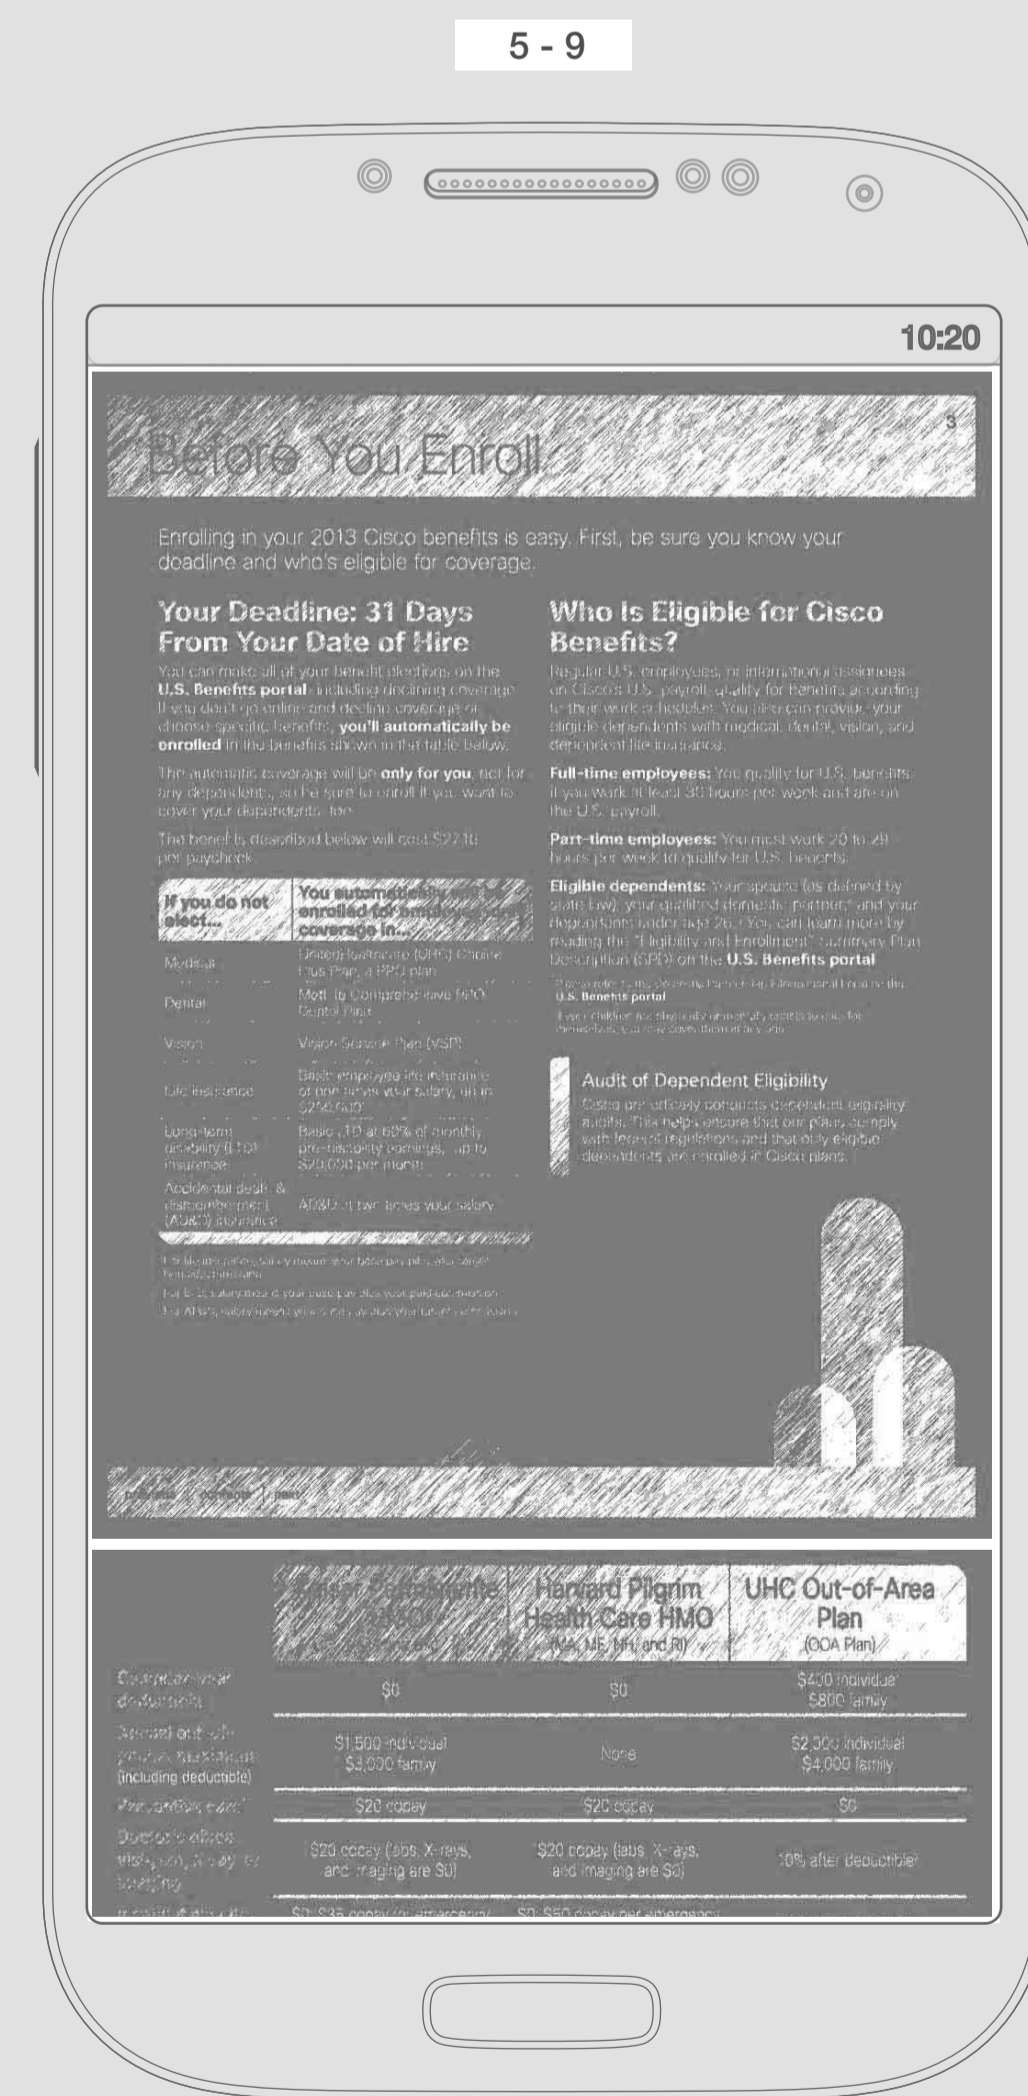

Top & bottom bars

Swipe left in order to see the next file

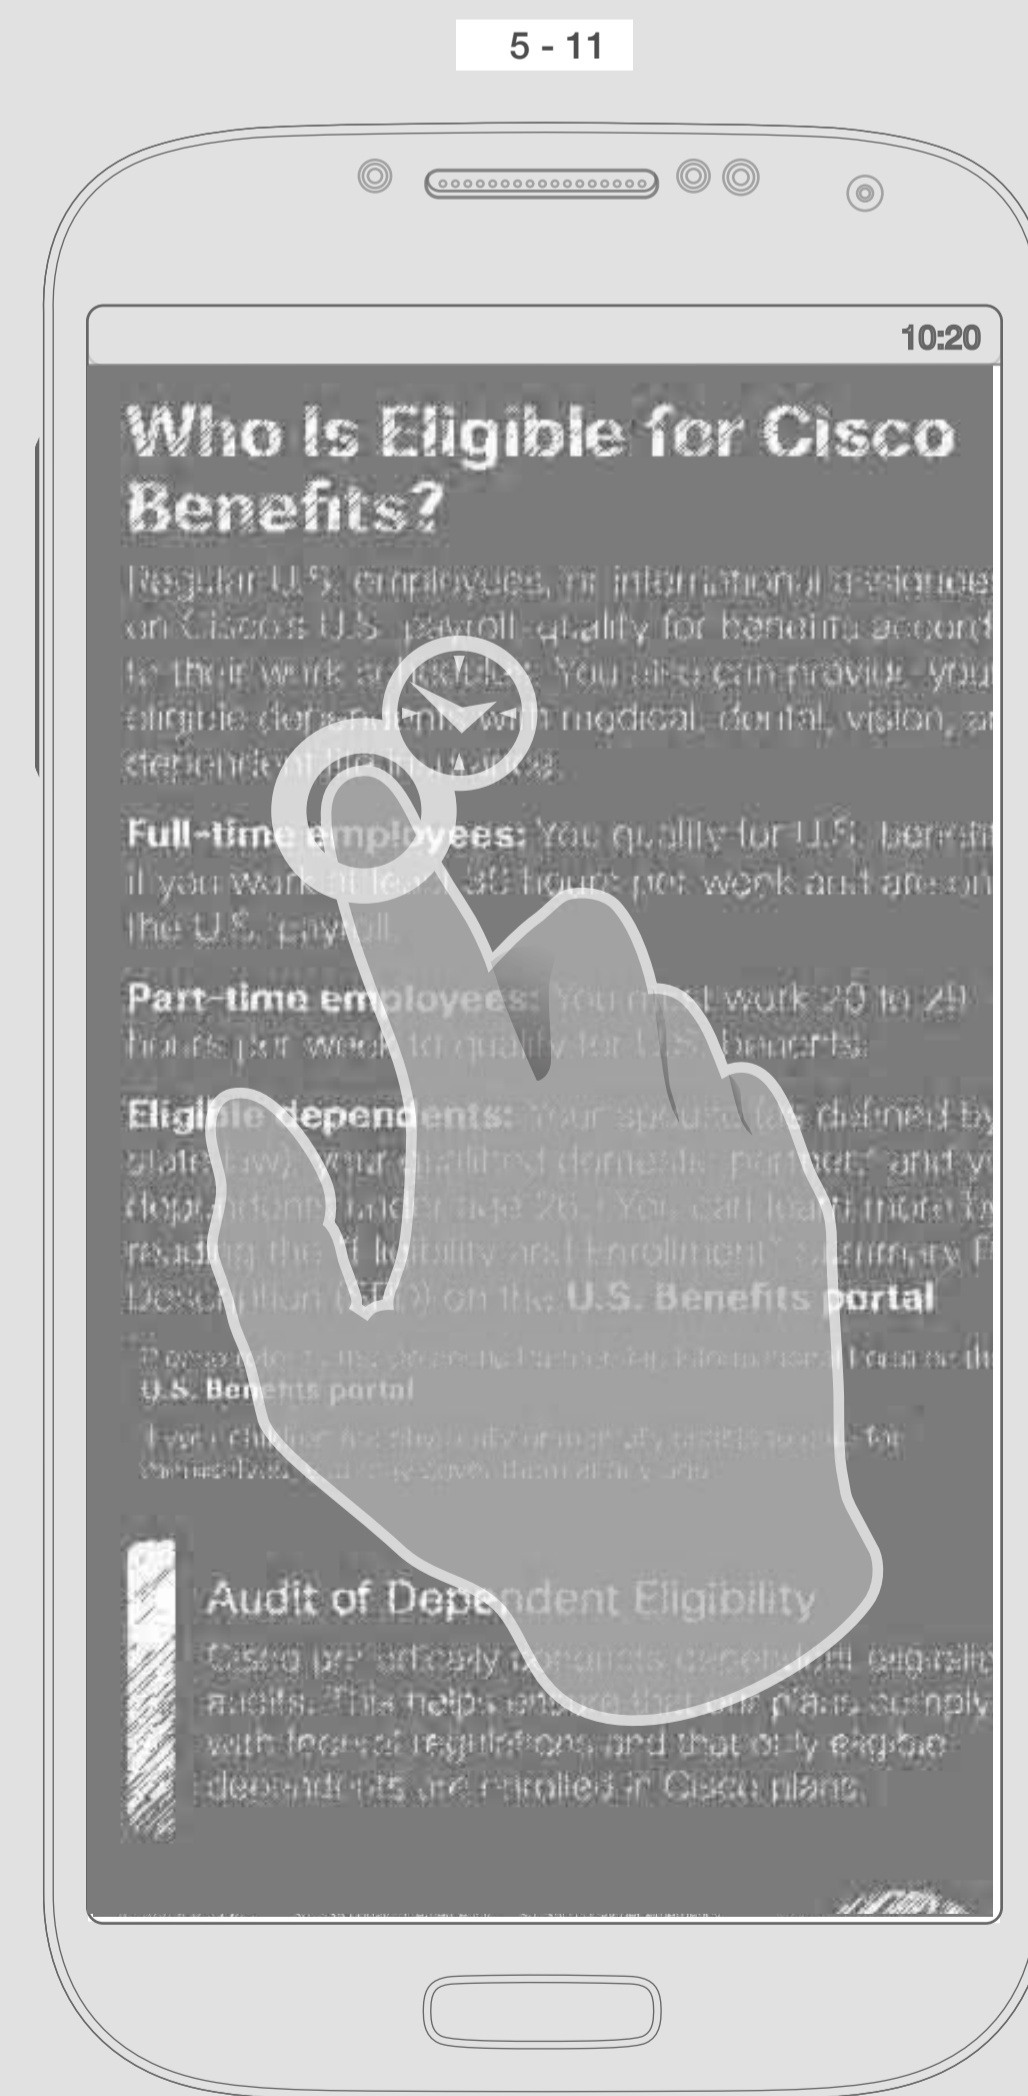

If the file is doc, ppt or contains several pages, user should see the top of next page and also scroll bar + paginators (for ex. 1 of 45)

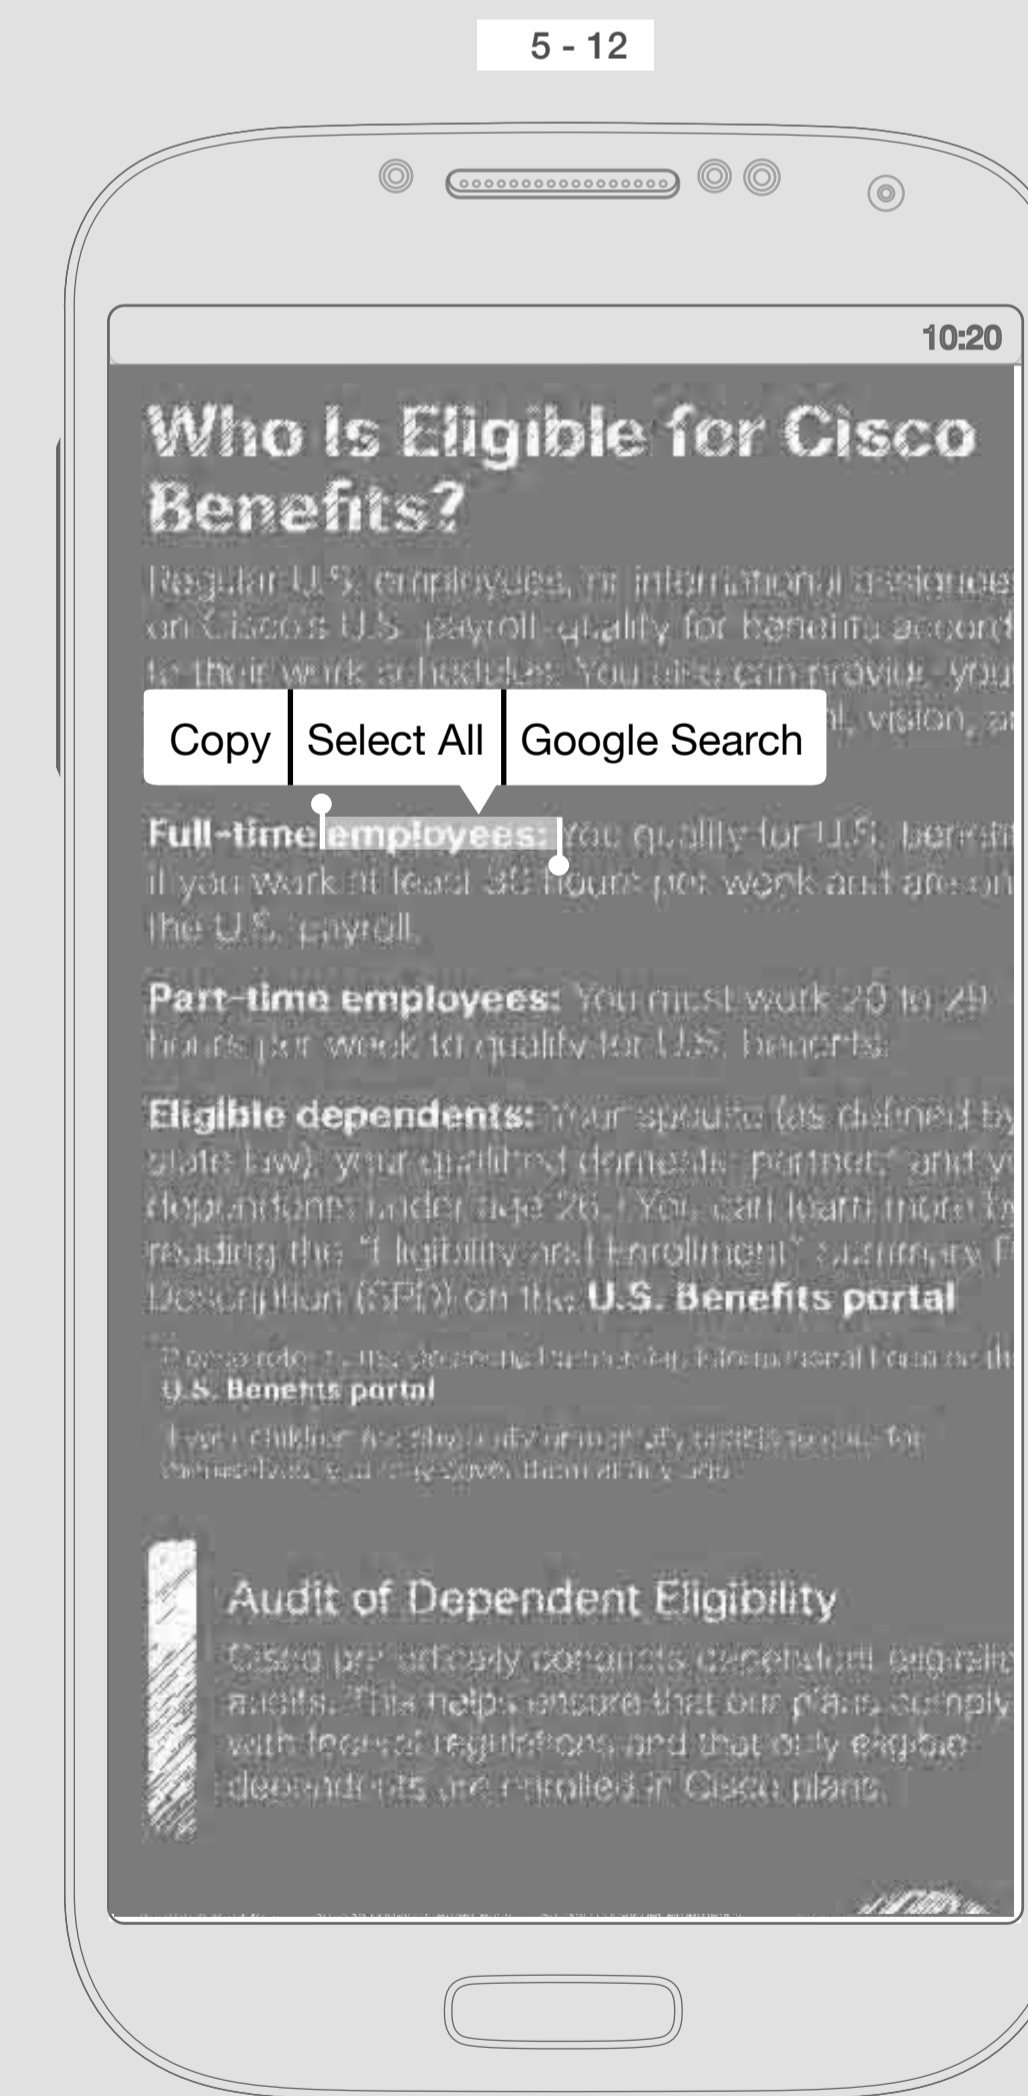

Paginatons should smoothly goes away after some second.
One tap, should remove all the bars (Top & bottom) beside the scroll bar and paginators

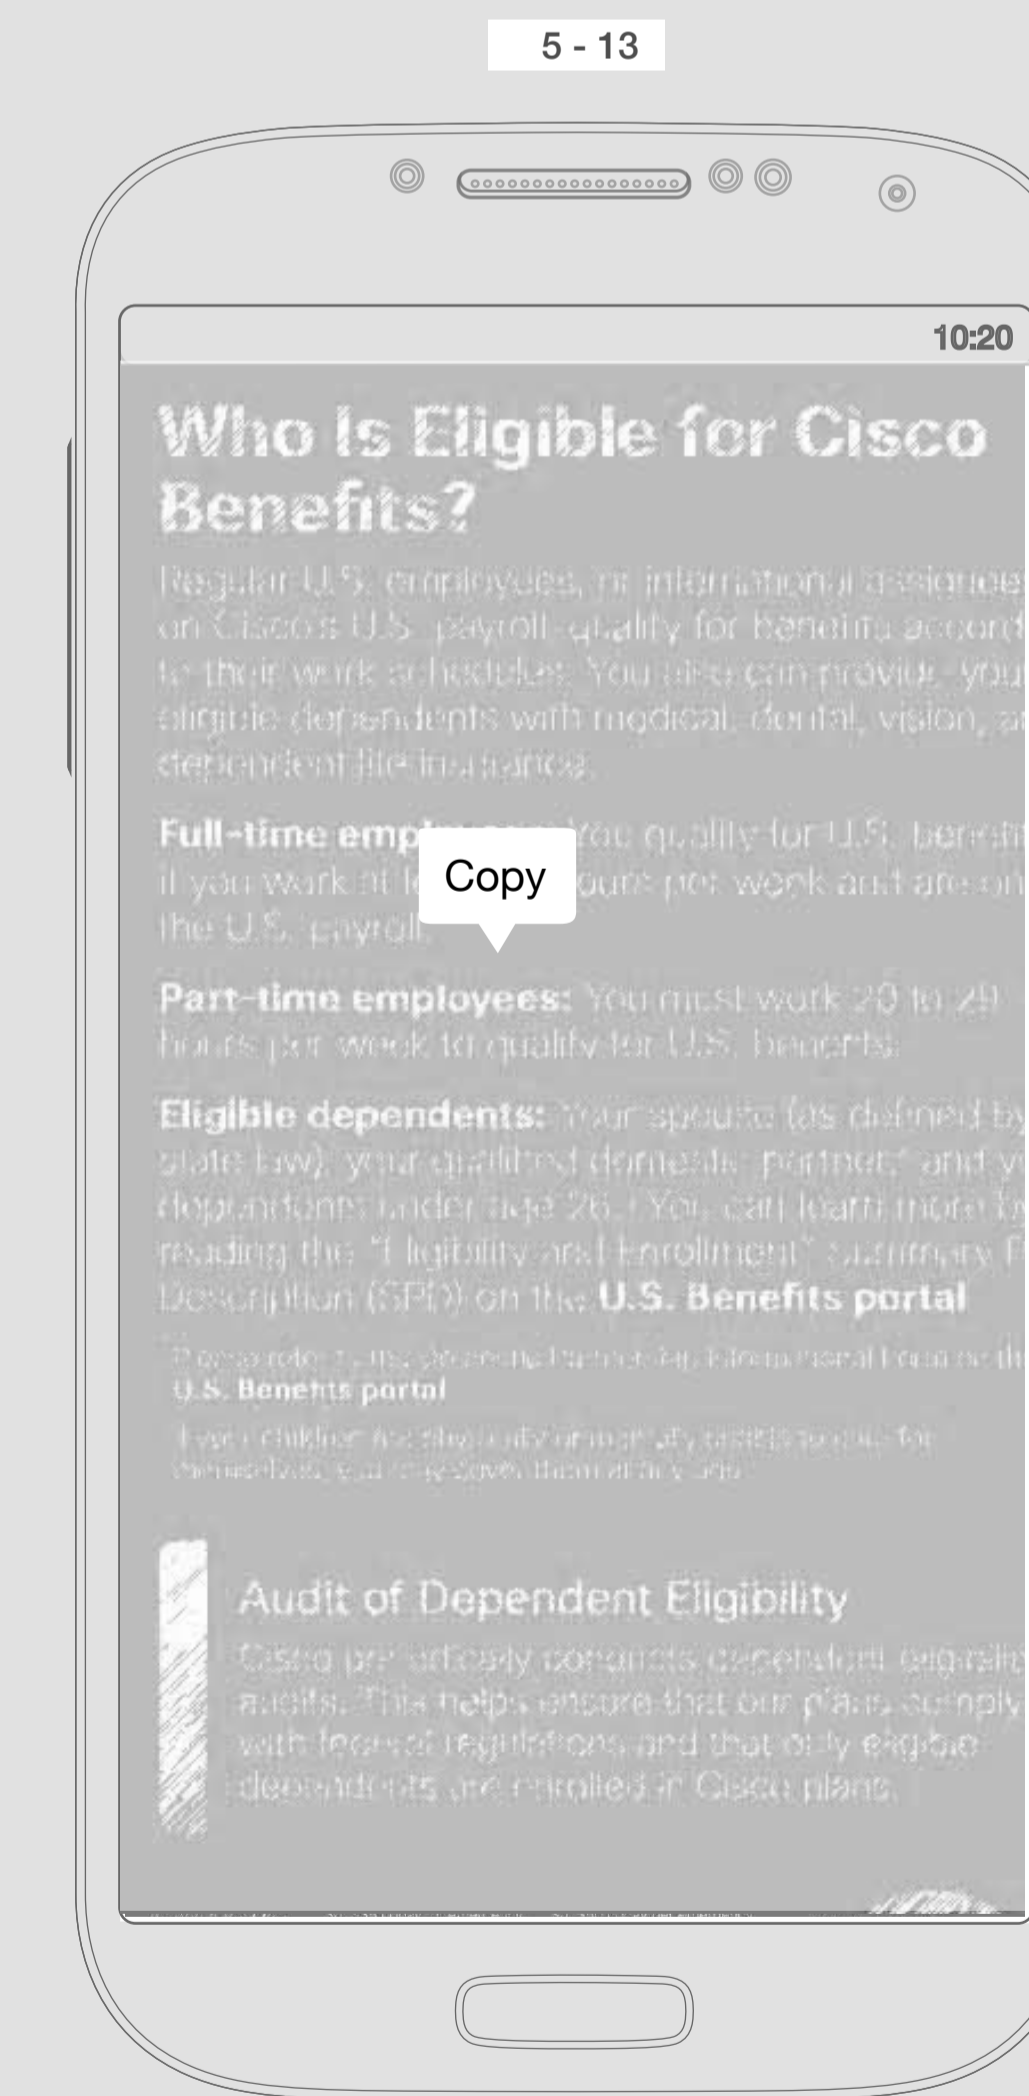

Zoom in to be able to see text bigger, And also the bars should not be shown.

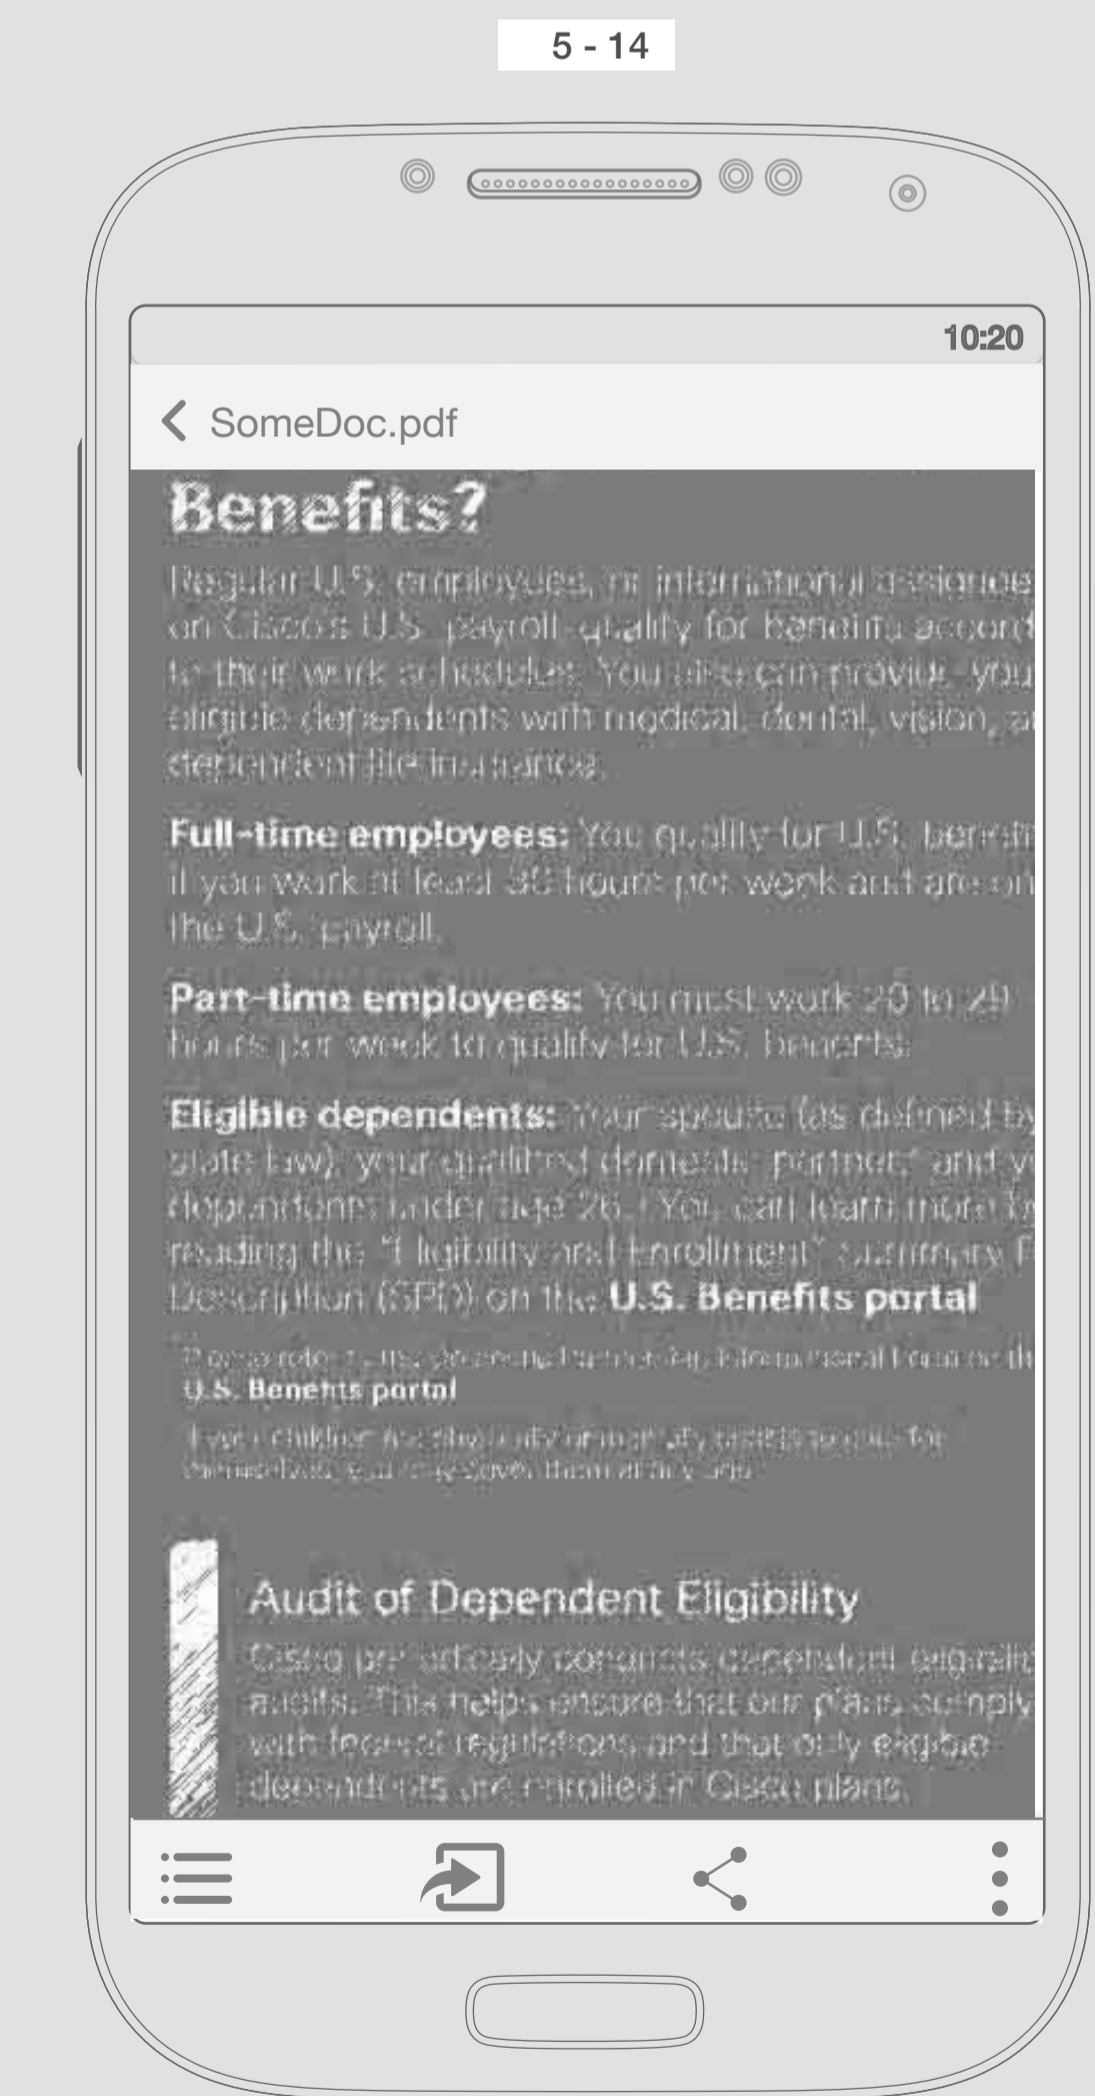

Pressing one word should select the whole word and show some functionalities

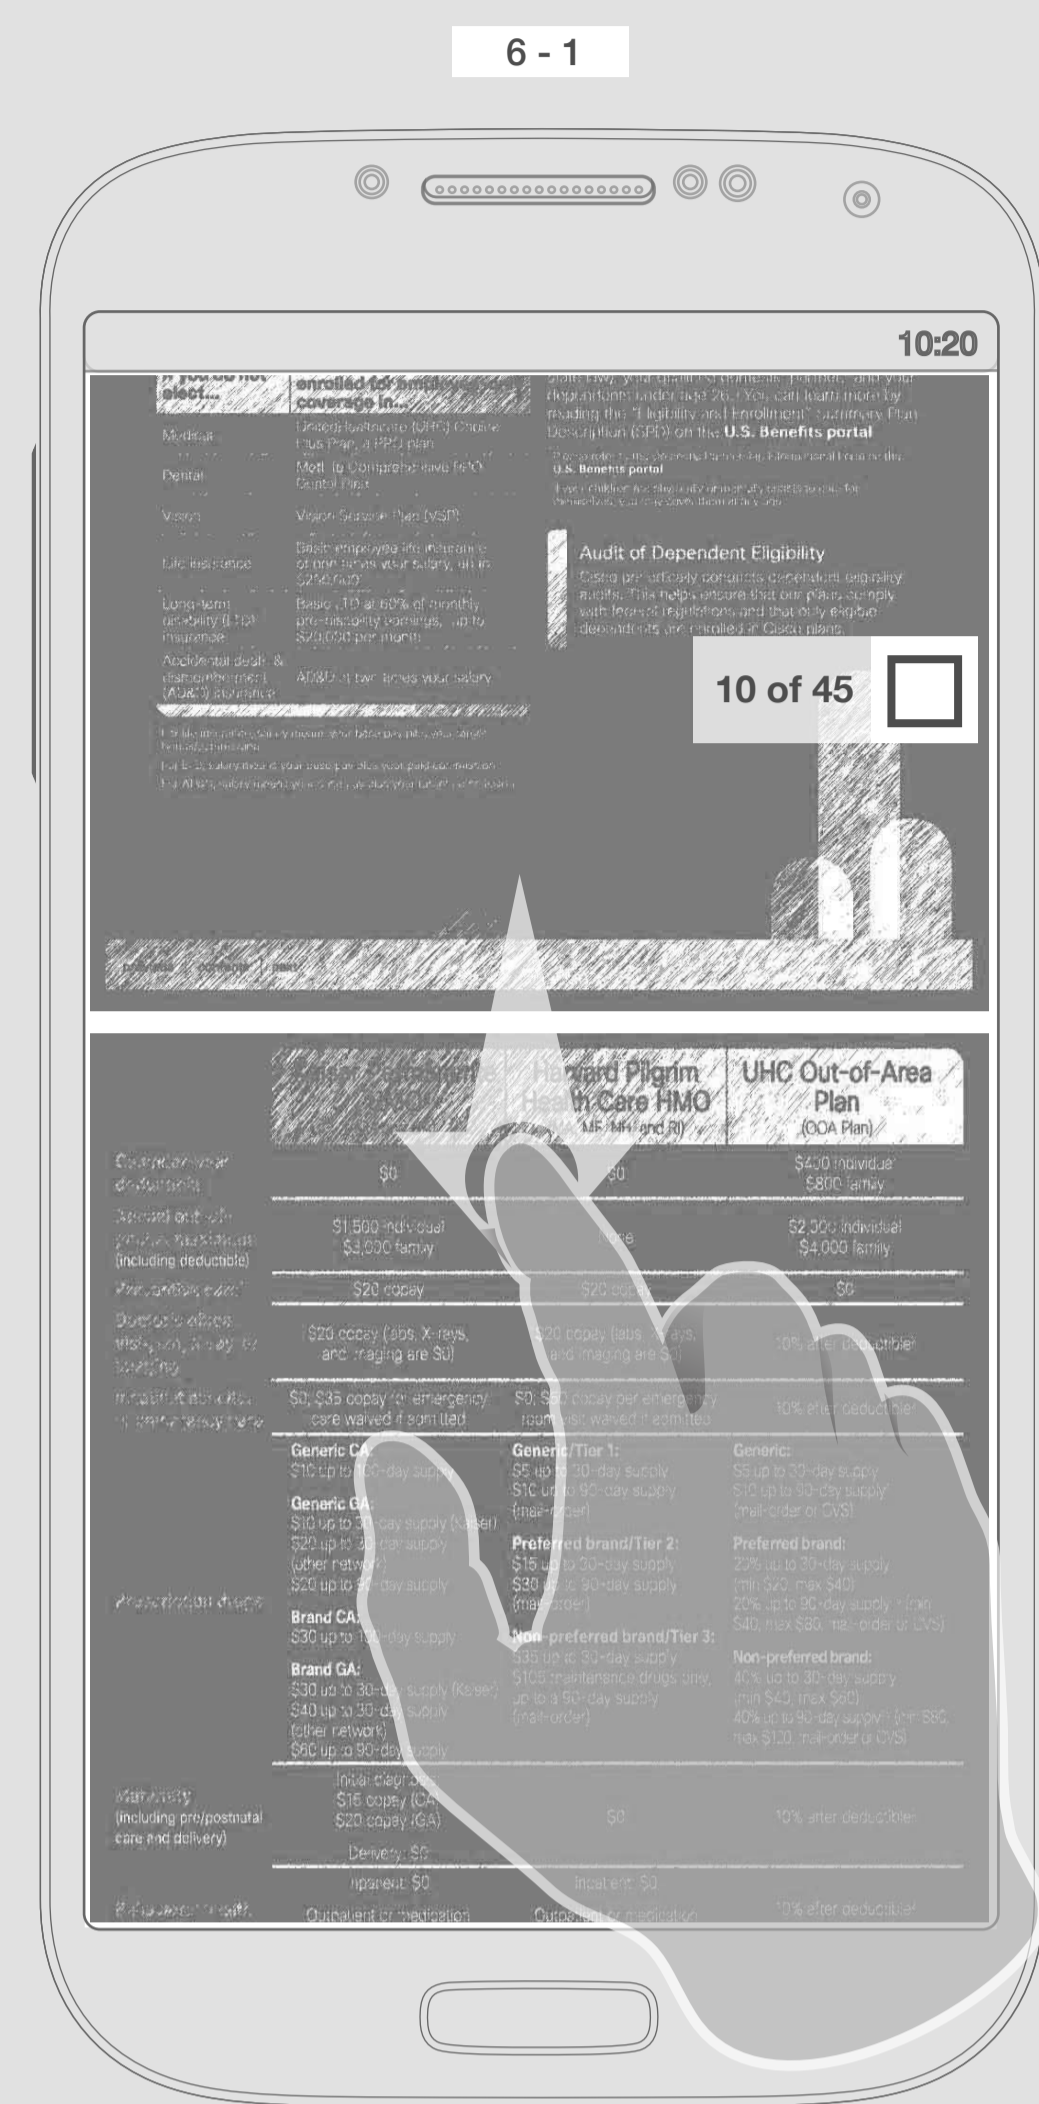

Copy, Select All and Define should be shown above the word ...
If user select copy, it should jump to 5-14. User should be able to drag the pointer around the word so he can select the area he wants.
Google Search (TBD)

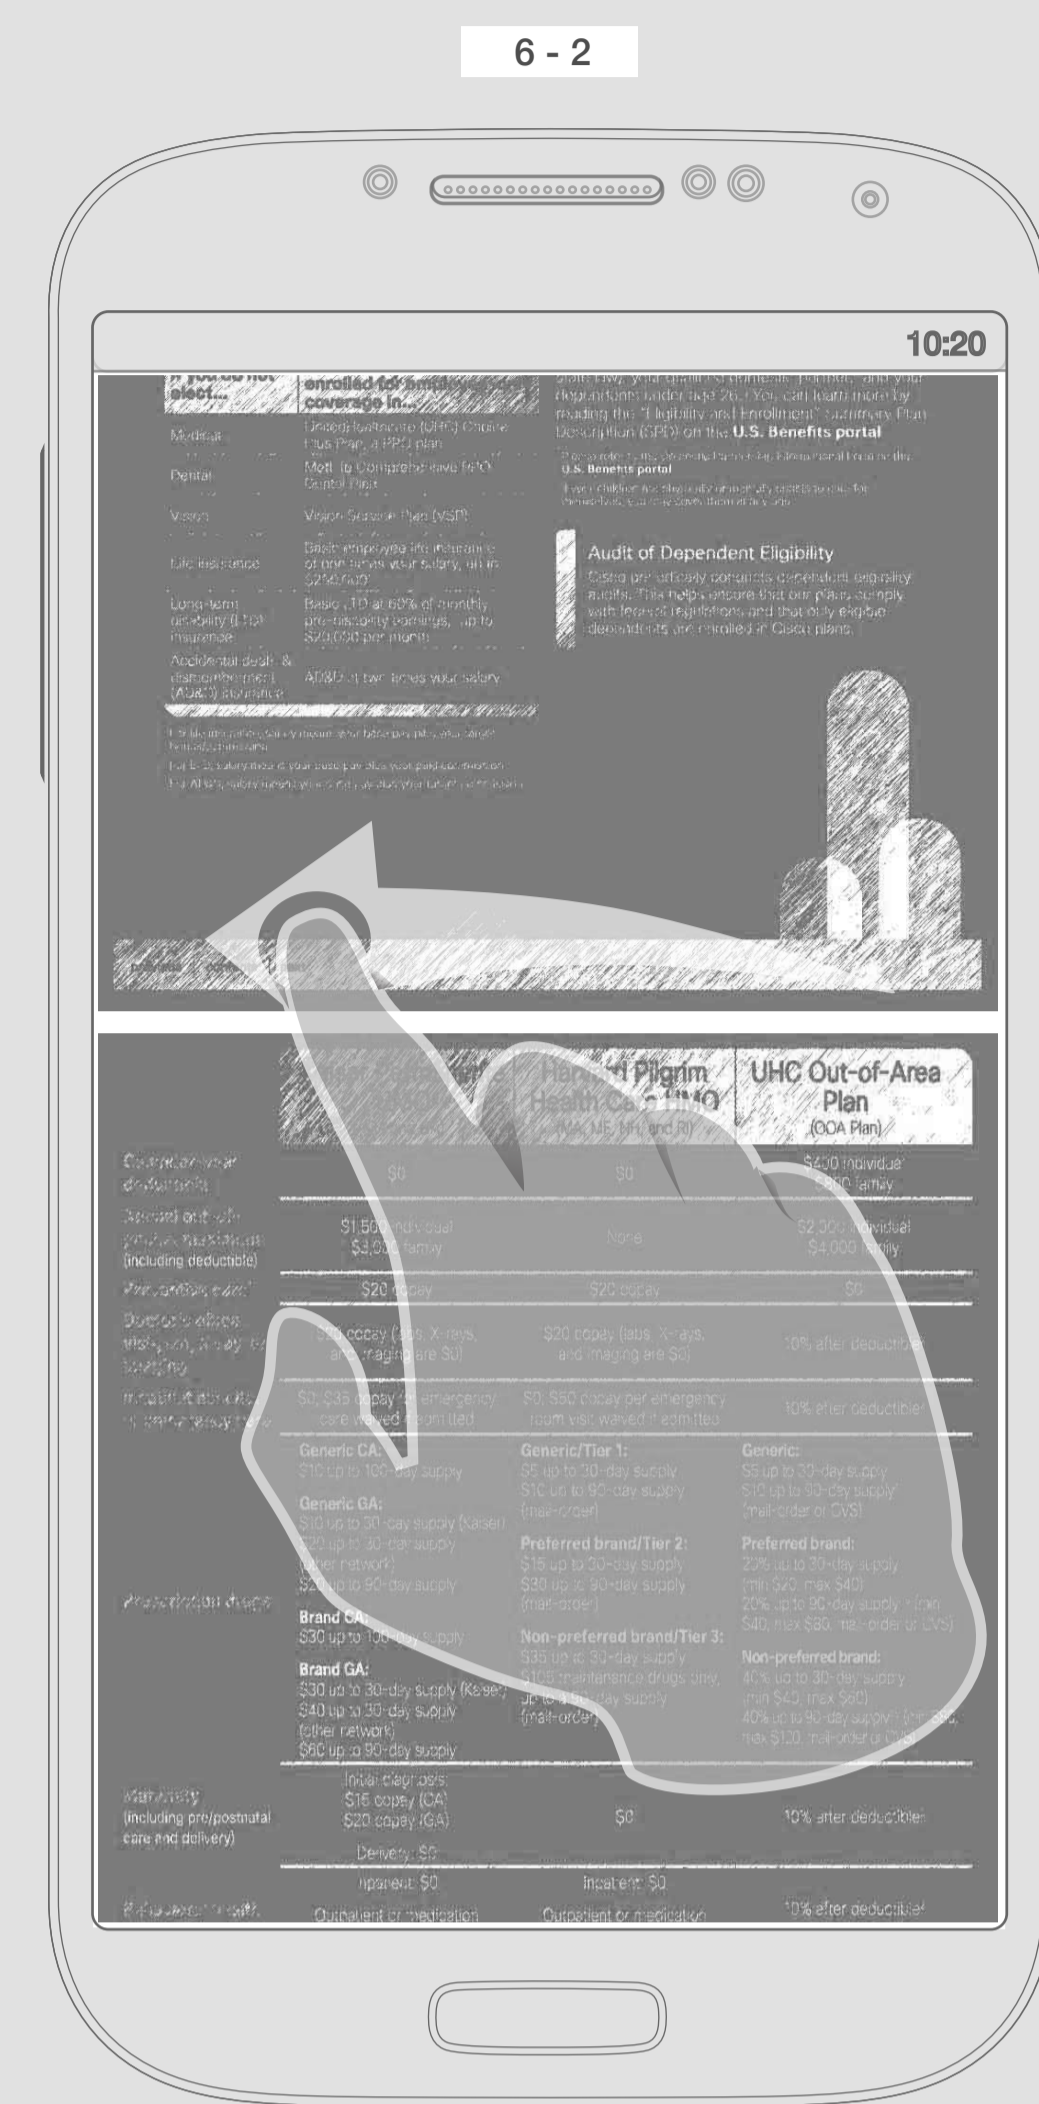

If user taps on "Select All", it should highlight all the texts and images the document.

And if user tapped on "Copy", highlight goes away and bars will appear.

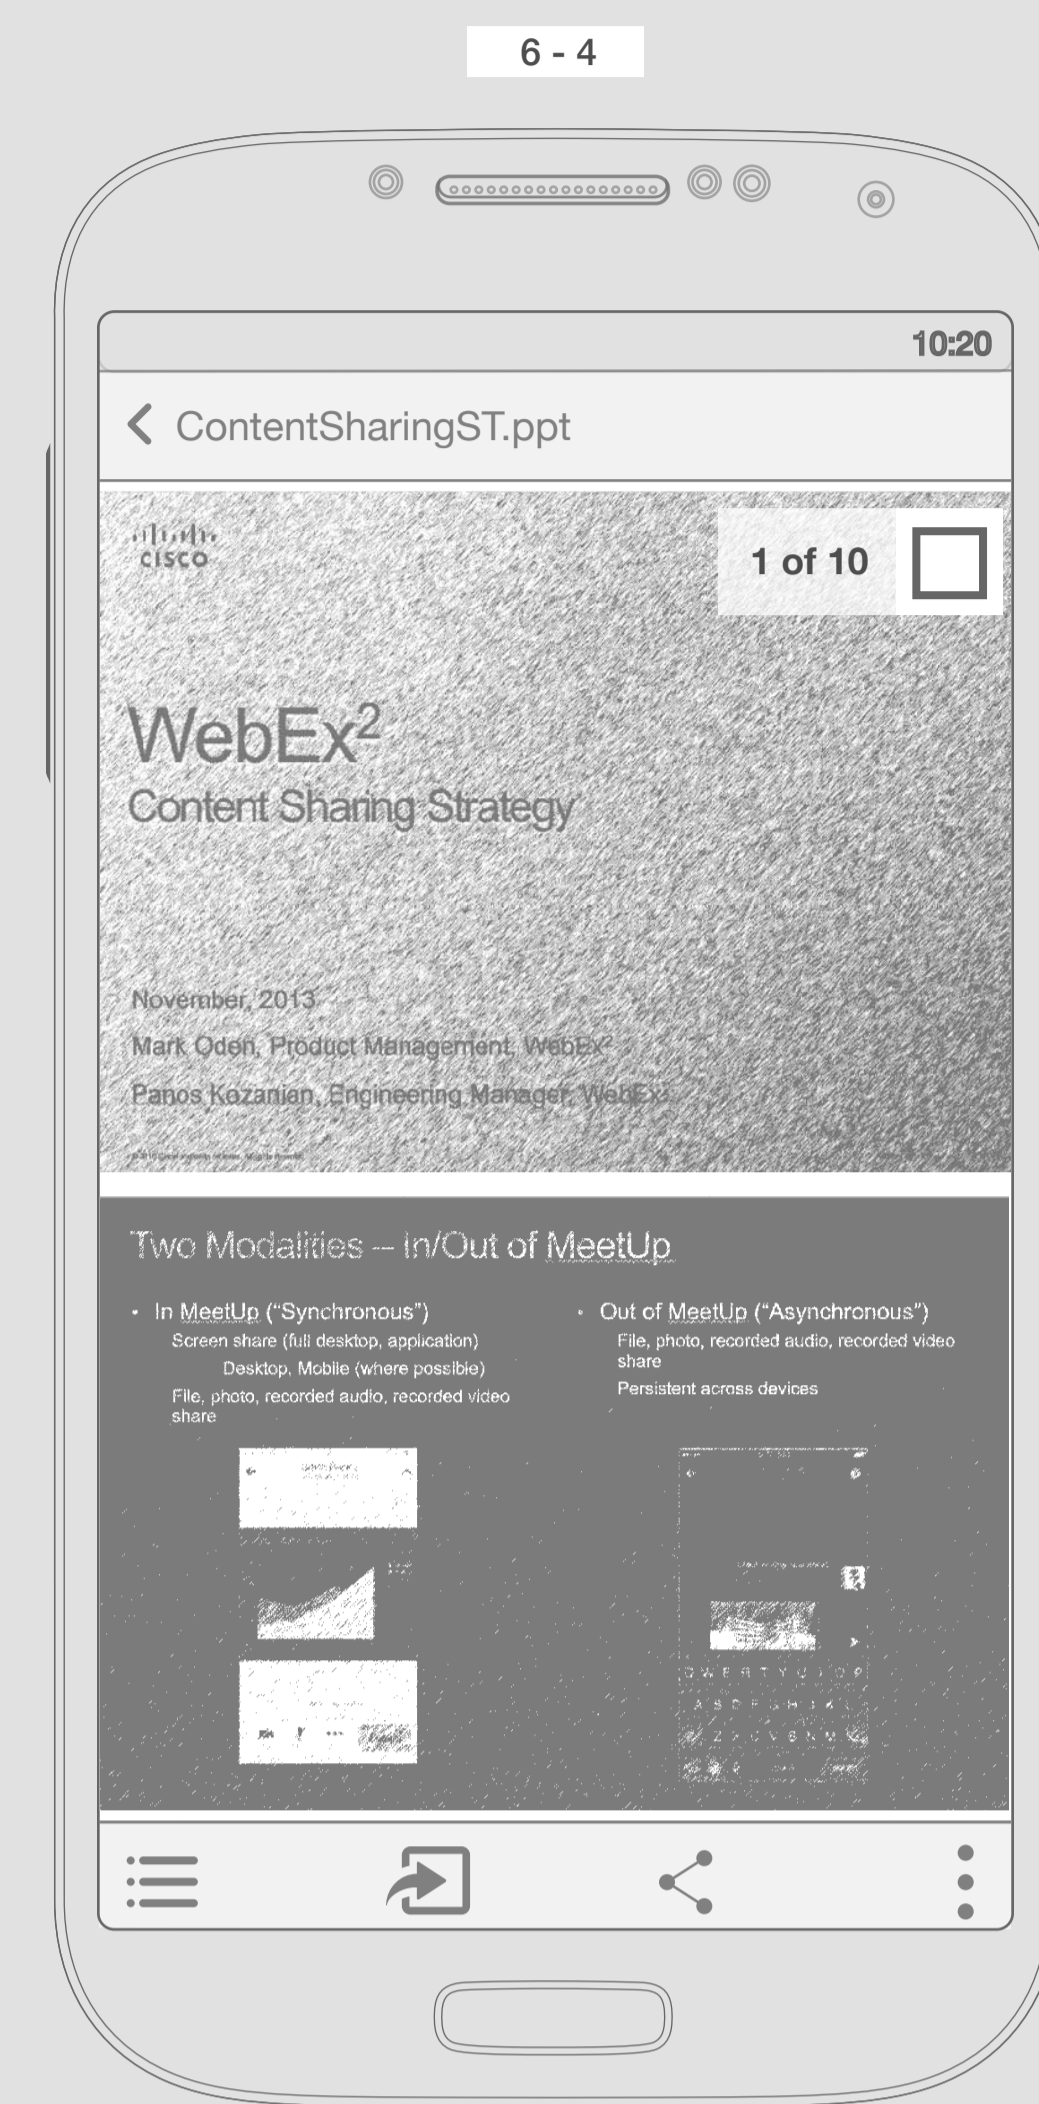

User can scroll vertically through pages of the file, scroll bar & pagination will appear and bars will disappear so give the user more space.

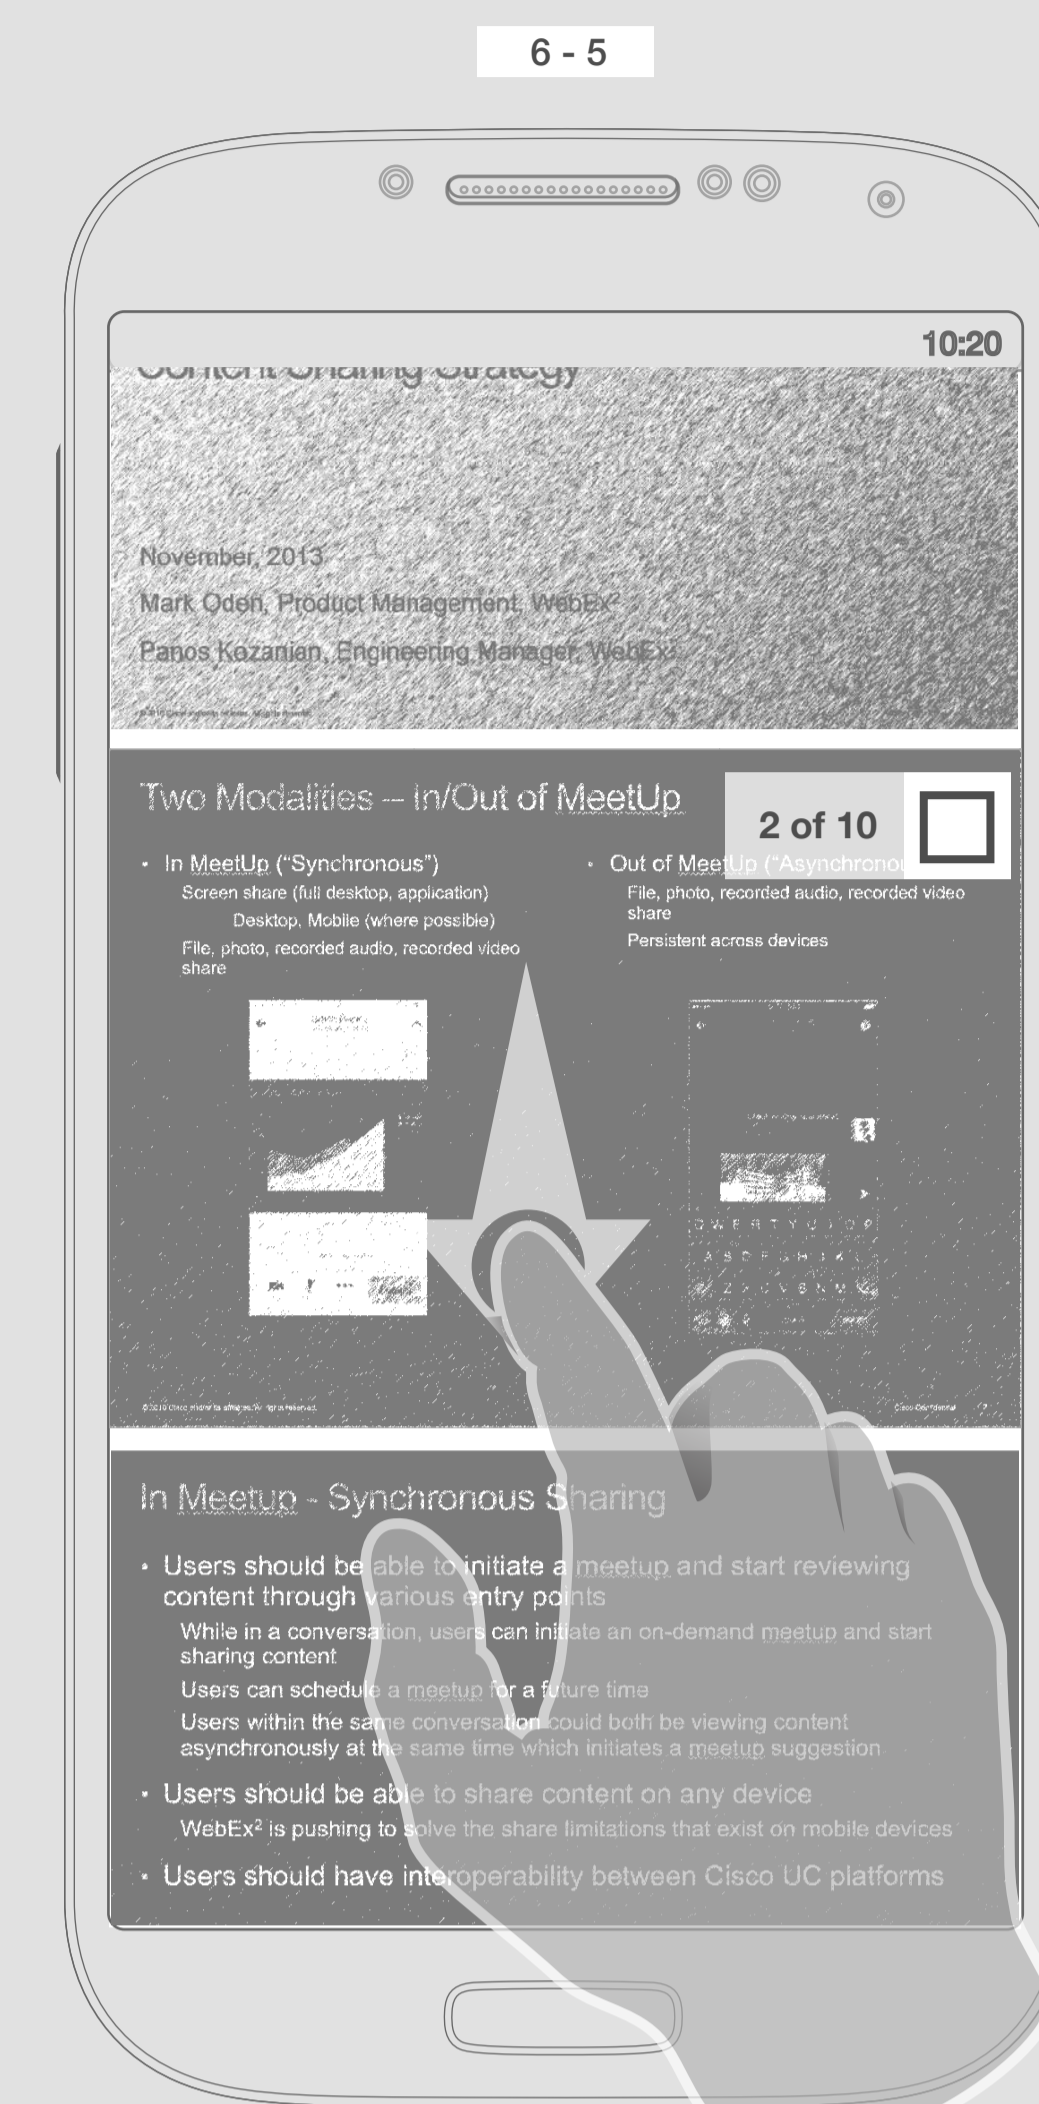

Swiping left or right takes the user to a different file
